Introduction

The profile is one of 6 ward area profiles prepared to support the work of the East Lothian Partnership and compliment the East Lothian Profile.

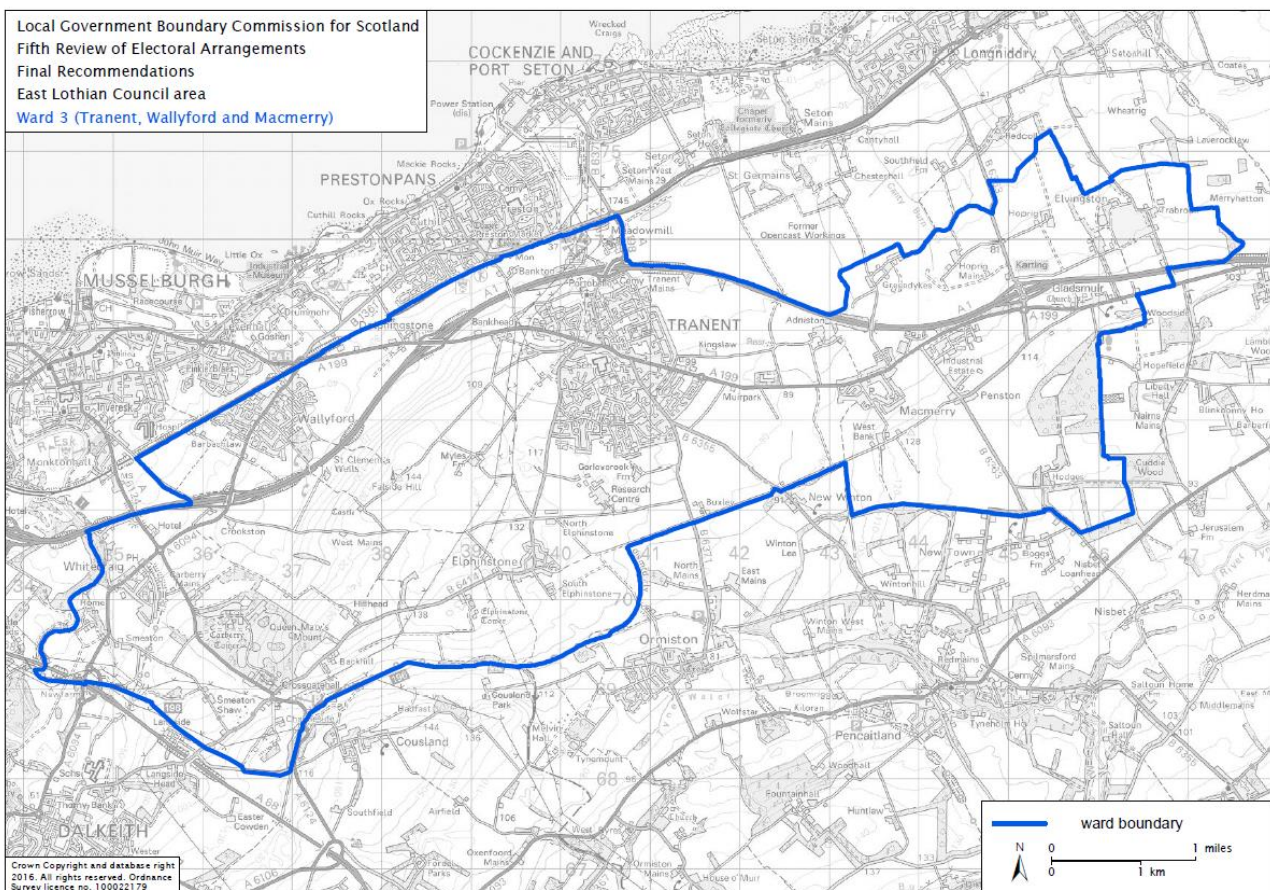

Where there is no information for the TWM ward, reference has been made to the Fa'side Area Partnership, which is largely comprised of much of the TWM ward. However the boundary differs in that Fa'side also includes Ormiston & Pencaitland, but not Wallyford.

The profile has been compiled in consideration of the East Lothian Single Outcome Agreement and to reflect the priorities identified by the East Lothian Community Planning Partnership.

The Tranent, Wallyford & Macmerry (TWM) Ward

Tranent, Wallyford & Macmerry (TWM) is the East Lothian Council Multi-member ward situated to the west of East Lothian and centred on Tranent.

Figure 1 - Ward Map (Local Government Boundary Commission for Scotland)

PLEASE NOTE - Throughout this profile a number of different sources have been used to gather statistical information, which each use different boundaries and area definitions. In this report:

- **Intermediate zones** are also used to present variations within the ward. The ward is divided into Wallyford & Whitecraig, Tranent North and Tranent South.
- **Data zones** are the smallest geographic areas at which data is collected and analysed. There are 26 in the TWM ward.
- **Area Partnership:** The Fa'side Area Partnership is comprised of largely of the TWM ward, however it also includes the villages of Ormiston and Pencaitland, but does not include Wallyford.

Population

Scotland's Census 2022 states that **20,714** people live in the Tranent, Wallyford & Macmerry ward, accounting for 18.4% of the population of East Lothian.

HEADLINES – Population

- 18.4% of the population of East Lothian live in the TWM ward
- 59.1% of the ward's population live in the town of Tranent
- English is the main language for 96.3% of all people (aged 3 and over) living in this ward, similar to the East Lothian figure of 96.5% and higher than the 94.5% across the country as a whole.
- In this ward 87.1% of the population were born in Scotland higher than the rate for East Lothian or Scotland as a whole.
- 3.2% of people in this ward were from minority ethnic groups similar to the rate for East Lothian and lower than the rate for Scotland as a whole.

Population Distribution

- 59.1% (12,237) of the ward population live in Tranent.
- 21.6% (4,475) of the ward population live in Wallyford.
- 6.9% (1,437) of the ward population live in Macmerry.
- 6.0% (1,253) of the ward population live in Whitecraig.
- 2.6% (541) of the ward population live in Elphinstone.
- In the TWM ward 51.3% of the population are female and 48.7% are male.
- In this ward there are proportionally more 0 to 15 years people and less people aged 65 and over when compared to East Lothian and across Scotland as a whole.

Table 1 shows the proportion on the population in each age category. The 65 and over age group is lower when compared to the East Lothian and national figures.

Table 1- Age Distribution (Scotland's Census 2022)

| | TWM | East Lothian | Scotland |
|-----------------------------------------|-------|--------------|----------|
| % of the population (0-15) | 19.2% | 18.0% | 16.4% |
| % of the population that are (16-64) | 63.8% | 60.9% | 63.6% |
| % of the population that are 65 or over | 17.0% | 21.1% | 20.0% |

Country of Birth and Ethnicity

According to Scotland's Census 2022 figures:-

- 2.4% of the ward were born outside of Europe, lower than the 3.1% for East Lothian and the 5.5% across Scotland.
- In this ward 87.1% of the population were born in Scotland compared to 80.1% of residents in East Lothian and 79.4% across the country as a whole.
- 94.0% of the TWM ward were born in the UK, higher than the 92.6% for East Lothian and 89.8% across Scotland.

Table 2 – Country of Birth (Scotland’s Census 2022)

| | Europe Total | Europe Non EU or UK | EU | UK | Scotland | Africa | Middle East and Asia | The Americas and the Caribbean | Antarctica and Oceania |
|---------------------------------|--------------|---------------------|------|-------|----------|--------|----------------------|--------------------------------|------------------------|
| Tranent, Wallyford and Macmerry | 97.6% | 0.2% | 3.4% | 94.0% | 87.1% | 0.7% | 1.0% | 0.5% | 0.2% |
| East Lothian | 96.9% | 0.3% | 3.9% | 92.6% | 80.1% | 0.8% | 1.2% | 0.8% | 0.3% |
| Scotland | 94.5% | 0.4% | 4.3% | 89.8% | 79.4% | 1.3% | 3.0% | 0.9% | 0.3% |

[Search | Scotland’s Census \(scotlandscensus.gov.uk\)](https://scotlandscensus.gov.uk)

- 86.1% of people in this ward identify themselves as White Scottish – higher than the rate for East Lothian and across Scotland as a whole.
- 3.2% of people in this ward were from minority ethnic groups similar to the rate for East Lothian and lower than the rate for Scotland as a whole.

Table 3 - Ethnic identity (Scotland’s Census 2022)

| Ethnicity | White Scottish | White Other | Minority Ethnic Groups |
|---------------------------------|----------------|-------------|------------------------|
| Tranent, Wallyford and Macmerry | 86.1% | 10.7% | 3.2% |
| East Lothian | 79.5% | 17.4% | 3.1% |
| Scotland | 77.7% | 15.2% | 7.1% |

[Search | Scotland’s Census \(scotlandscensus.gov.uk\)](https://scotlandscensus.gov.uk)

English is the main language for 96.3% of all people (aged 3 and over) living in this ward, lower than the 96.5% for East Lothian and higher than the 94.5% across the country as a whole.

Figure 2 – Main Language (Scotland’s Census 2022)

[Search | Scotland’s Census \(scotlandscensus.gov.uk\)](https://scotlandscensus.gov.uk)

Religion

Across Scotland 38.8% of the population stated their religion as Christian and 2.2% identified as Muslim in Scotland's Census 2022. At the same time 51.1% of people stated that they had no religion.

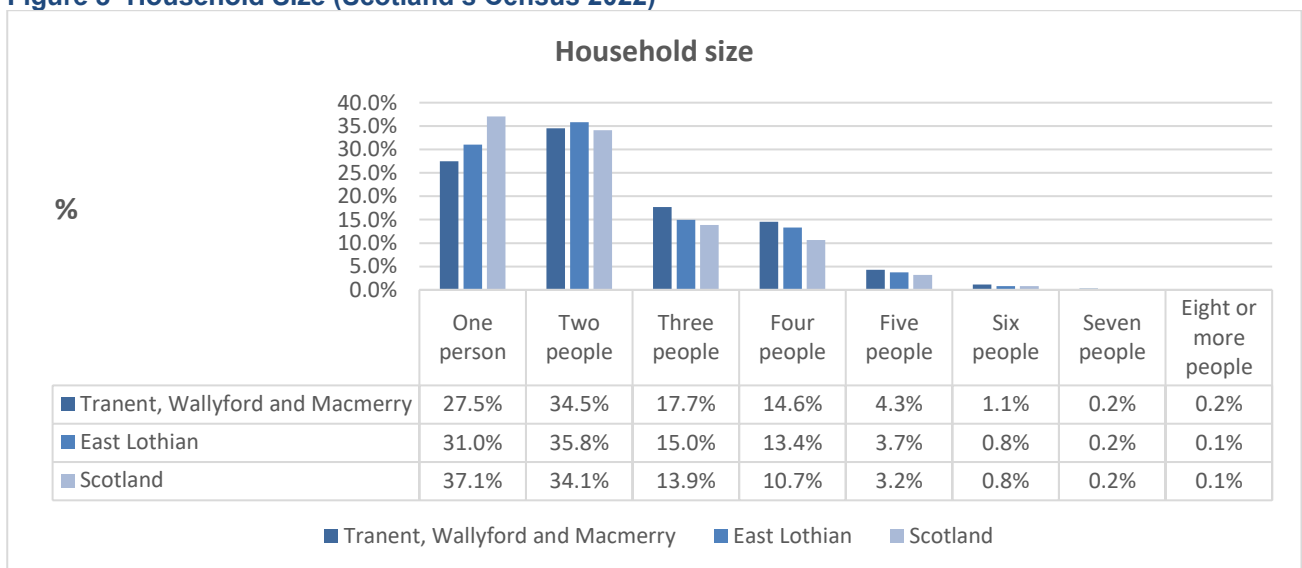

In the Dunbar & East Linton ward:

- 32.5% of the population declared that they were Christian (East Lothian 35%).
- 1.0% reported their religion as Muslim (East Lothian 0.8%).
- 60.5% stated they had no religion (East Lothian 57.5%).

Household Size

Figure 3 shows that there are less one person households in the TWM ward when compared to East Lothian and Scotland as whole.

Figure 3- Household Size (Scotland's Census 2022)

Deprivation in the ward

The Scottish Index of Multiple Deprivation (SIMD)

The SIMD is a tool used by the Scottish Government to identify concentrations of deprivation across Scotland in a consistent manner. It does this by dividing the country into 6,976 data zones (average 767 people per data zone).

These data zones are then ranked against key measures of deprivation – income, education, crime, health, employment, geographic access and housing – as well as by overall deprivation.

It is important to note that the SIMD only identifies concentrations of deprivation. Therefore not all people who are deprived live in a data zone highlighted by the SIMD, and not all people living within an identified data zone are deprived.

HEADLINES – Deprivation in the ward

- There are clusters of deprivation around Tranent town centre and Wallyford.
- High Street/Northfield Lindores Drive, which is the most deprived data zone in East Lothian
- 9 data zones in the TWM ward are within the 20% most deprived in East Lothian, 4 of which are in the 20% most deprived in Scotland
- 2 data zones in the TWM ward fall within the 20% least deprived in East Lothian and Scotland

The map shows all of the 26 data zones in the TWM ward and illustrates their ranking out of the 6,976 data zones in Scotland. It can be used to identify geographic clusters of relative deprivation in the ward.

Figure 4 –SIMD2020 Overall Deprivation in the TWM ward (East Lothian Council)

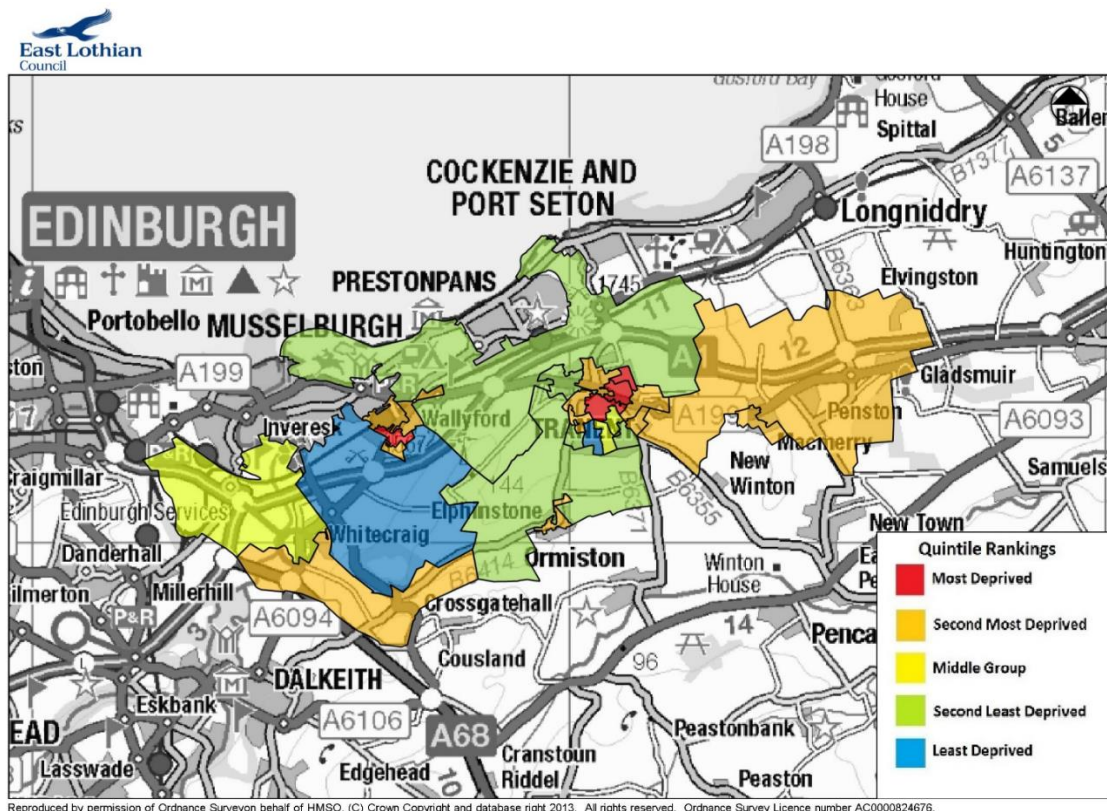

Table 4 shows the data zones in the TWM ward and illustrates the overall deprivation by quintile out of the 6,976 data zones in Scotland. It can be used to identify geographic clusters of relative deprivation in the ward.

- There are clusters of deprivation around Tranent town centre and Wallyford.
- High Street/Northfield Lindores Drive, which is the most deprived data zone in East Lothian.
- 9 data zones in the TWM ward are within the 20% most deprived in East Lothian, 4 of which are in the 20% most deprived in Scotland.
- 2 data zones in the TWM ward fall within the 20% least deprived in East Lothian and Scotland.

[Scottish Index of Multiple Deprivation 2020 - gov.scot](https://www.gov.scot/Topics/indicators/simd2020)

Income and Employment

Although East Lothian is generally considered to be an area of high employment and general affluence there is considerable variation in economic activity, unemployment and the financial position of households between and within East Lothian's wards.

This section concentrates on income and employment figures across the ward in relation to East Lothian averages as well people's perceptions of their own financial position.

HEADLINES – Income and Employment

- Approximately 8.9% of the population of the working age population of the Dunbar and East Linton Ward is considered to be employment deprived, compared to East Lothian (8.1%) and Scotland (9.3%).
- The proportion of the population considered to be employment deprived in the ward ranges from 2% to 20%.
- Approximately 12.5% of the population in the TWM ward are considered to be income deprived, compared to the overall East Lothian rate of 10.2% and Scotland 12.1%.
- The proportion of the population that are considered to be income deprived in the ward ranges from 3% to 31%.
- 19.5% of the working age population in the TWM ward claimed universal credit in September 2024 higher than the pre Covid figure of 10.3% in February 2020.

Employment Patterns in the Tranent, Wallyford & Macmerry Ward

Figure 5 shows that the breakdown of employment across different industry sectors in the Dunbar and East Linton ward was generally comparable with the rest of East Lothian.

In this ward a higher percentage of people worked within the construction industry and less people worked in education than across East Lothian.

In relation to employment across Occupational Groups Figure 6 shows that less people in this ward were employed in professional occupations and more were employed in caring/leisure and skilled trades than across East Lothian as a whole.

Figure 5 - Employment by Industry Category (Scotland's Census 2022)

Figure 6 - Employment across Occupational Groups (Scotland's Census 2022)

Economic Activity across the Ward

Figure 7 shows that rates of economic activity across East Lothian were higher than across Scotland as a whole. 80.6 of the working age population were economically active in this ward, similar to the East Lothian figure of 80%.

Figure 7 – Rates of Economic Activity (Scotland’s Census 2022)

Employment Deprivation

The SIMD Employment Domain is based on the following methodology:

- Unemployment Claimant Count averaged over 12 months
- Working Age Incapacity Benefit or Employment Support Allowance recipients
- Working Age Severe Disablement Allowance recipients

- Approximately 8.9% of the population of the TWM ward is considered to be employment deprived, compared to East Lothian (8.1%) and Scotland (9.3%).
- 5 data zones in the TWM ward are in the 20% most employment deprived in Scotland.
- The proportion of the population considered to be employment deprived in the ward in 2016 ranges from 2% to 20%.

Table 8 – Employment Deprivation SIMD 2020 (www.sns.gov.uk/Simd/)

[Scottish Index of Multiple Deprivation 2020 - gov.scot](https://www.gov.scot/resources/information/scottish-index-of-multiple-deprivation-2020/)

Universal Credit

Universal Credit supports people who are on a low income or out of work, its aim is to ensure that people are better off in work than on benefits. Universal Credit gives support to people to prepare for work, move into work, or earn more. It is the recipient's responsibility to do everything they can to find work or increase their earnings.

Universal Credit replaces:

- Income-based Jobseeker's Allowance
- Income-related Employment and Support Allowance
- Income Support
- Working Tax Credit
- Child Tax Credit
- Housing Benefit

Table 9 shows that 19.5% of the working age population in this ward claimed Universal Credit in September 2024, which is below the East Lothian average of 14.8% (Scotland 16.4%). The current number of people on Universal Credit in this ward is 76.6% higher than the pre covid figure of 1020 in February 2020. Across the county there has been an increase of 73.8% compared to 121.9% nationally. The level of claimants in East Lothian and Scotland has been increasing steadily since May 2022, and is now at the highest level since lockdown.

Table 10 shows that 3% of the working age population in this ward were searching for work in September 2024, lower than the 2.2% for East Lothian and 3% for Scotland. The current number of people searching for work in this ward is 7.7% lower than the pre covid figure of 80 in February 2020. There were 9.3% fewer claimants in East Lothian when compared to the pre covid figure, whereas Scotland increased by 7.0%.

Table 9– Number of people on Universal Credit (Stat-Xplore)

| | Feb-20 | | Sep-24 | | Feb 20 to Sep 24 change | |

How is the ward coping financially?

Estimated household income varies across the ward, with a gap of £719 per week between the most affluent data zone and the least.

- 10 of the 26 data zones in the ward have median household incomes above the East Lothian average of £620.

Figure 8 - Median Household Income (Scot.Govt.)

[Banded income statistics: 2018 - gov.scot \(www.gov.scot\)](http://www.gov.scot/banded-income-statistics-2018)

Figure 9 shows that 40% of respondents in the TWM ward said that they were “Managing very/quite well” less than the East Lothian figure of 45%. 39% in this ward said they were getting by alright, East Lothian (38%).

Figure 9 - How households are managing financially (East Lothian Residents Survey 2024)

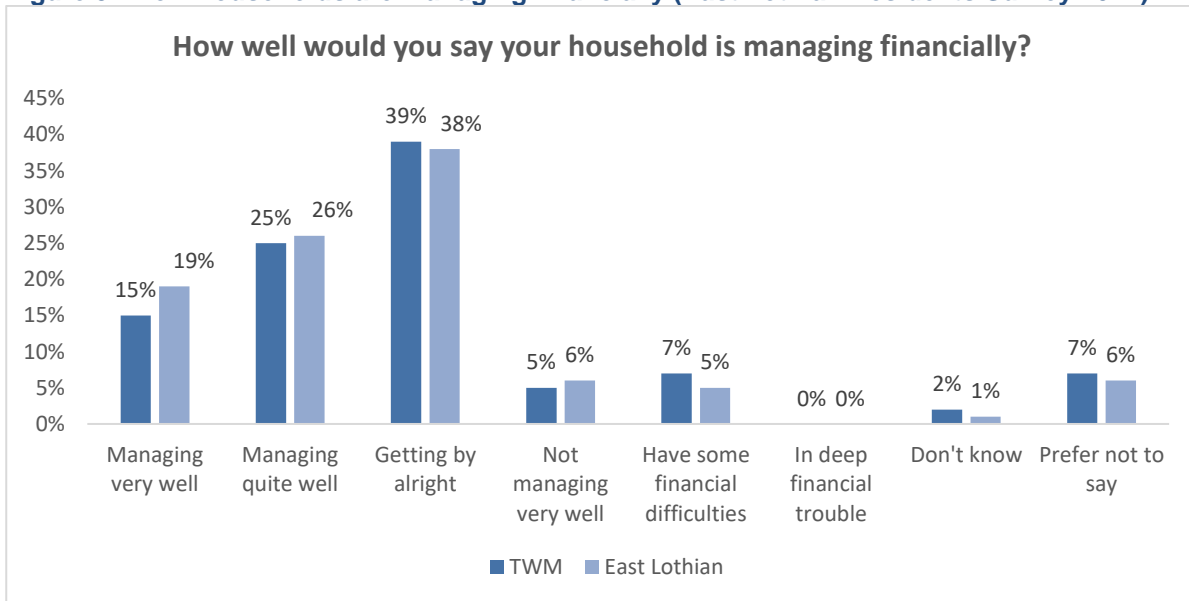

Figure 10 shows that the TWM residents had less available money for all categories with the exception of Home Contents insurance when compared to East Lothian as whole.. Having money available for a private pension was the lowest affordable category for both this ward and across East Lothian as a whole.

Figure 10 – Available Finances (East Lothian Residents Survey 2024)

Income Deprivation

The SIMD Employment Domain is based on the following factors: Income Support and Income-based Employment Support Allowance claimants (16-59); Job Seekers Allowance and Guaranteed Pension Credit Claimants (all ages); Universal Credit claimants with no employment marker; number of children in JSA, IS or ESA households; number of adults and children dependent on adults in receipt of Tax Credits

- 12.5% of the working age population of in the TWM ward is considered to be income deprived, higher than the East Lothian figure of 10.2% and Scotland 12.1%.
- The proportion of the population considered to be income deprived in the ward ranges from 3% to 31%.
- 4 of the 26 data zones in the ward are in the 10% most income deprived in Scotland, 3 of which are in the 10 % most income deprived in Scotland.
- 3 data zones are in the 20% least deprived in Scotland.

Education and Training

HEADLINES – Education and Training

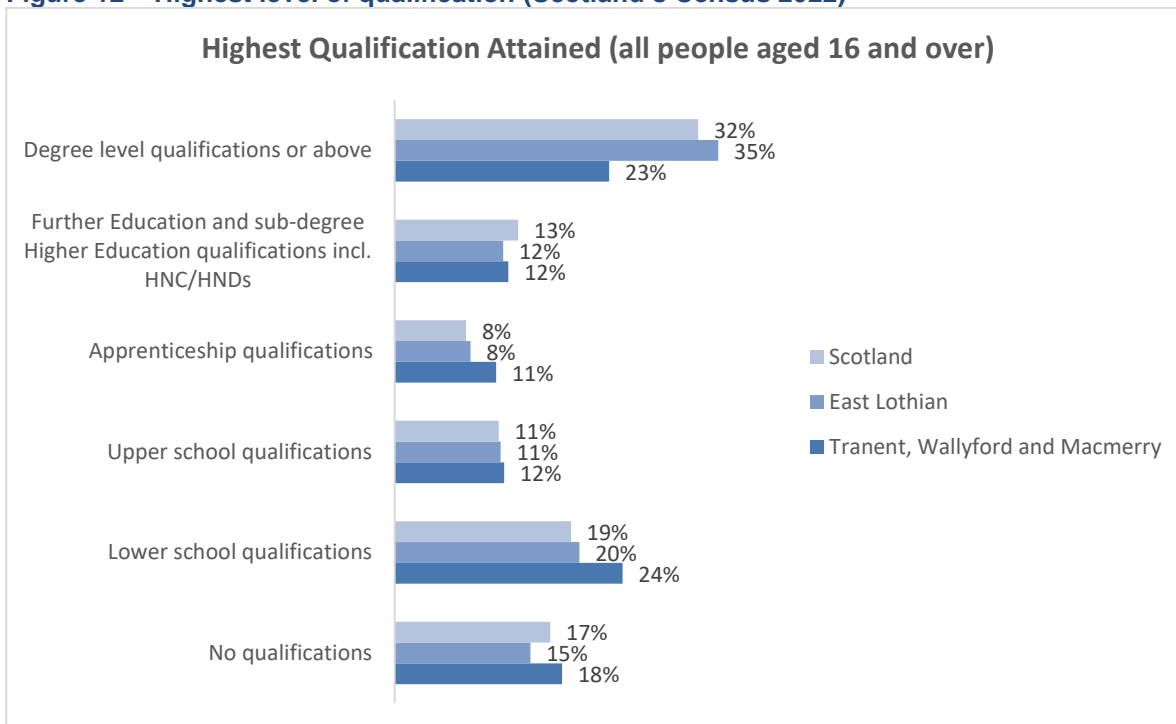

- 46% of people in this ward aged 16 and over have an apprentice qualification, further education qualification or degree level or above qualification (compared to the East Lothian figure of 54%).
- No data zones in this ward are within the 20% least educationally deprived in Scotland.
- 77% of Ross High School pupils achieved SCQF Level 5 or better, higher than the 82% for East Lothian and 88% for Scotland.
- The 84% Ross High School attendance rate was lower than 86% across East Lothian and Scotland.
- 95.5% of school leavers from Ross High School were initially assessed as having a 'positive destination' upon leaving school.

Education and Training among adults

According to the 2022 census:-

- 46% of people in this ward aged 16 and over have an apprentice qualification, further education qualification or degree level or above qualification (compared to the East Lothian figure of 54%).
- 23% have undertaken a degree level or above qualification (compared to 35% across East Lothian).
- 18% have no formal qualifications (below the East Lothian figure of 15%).

Education, Skills and Training Domain

The SIMD Education Domain includes indicators that measure both outcomes of education deprivation, such as lack of qualifications in children and adults, and causes of education deprivation such as absenteeism and lack of progression to further and higher education.

The Education Domain gives an education deprivation rank using the following indicators:

- *School pupil attendance*
- *School pupil performance*
- *Working age people with no qualifications*
- *17-21 year olds enrolling into full time higher education*
- *School leavers aged 16-19 not in education, employment or training*

- 9 data zones in the ward are amongst the 20% most educationally deprived in Scotland.
- No data zones are within the 20% least educationally deprived in Scotland.

Table 12 - SIMD Education Skills and Training domain (www.sns.gov.uk/Simd/)

Health and Social Care

HEADLINES – Health and Social Care

- Tranent South intermediate zone has the highest life expectancy in the ward for females and males.
- The variation in life expectancy across the ward’s intermediate zones is 4.7 for females and 3.7 years for males.
- Females life expectancy was 4.3 years higher than male life expectancy in Tranent North, the highest difference of all the ward’s intermediate zones.
- Across this ward the majority of people (57%) described their physical health as Very Good/Good, compared with the East Lothian figure of 63%.
- 63% of respondents in this ward stated their mental health as very good/good (East Lothian 71%).
- No data zones in the ward are in the 20% most deprived in Scotland in terms of the health domain.

This section focuses on a range of indicators which can be used to measure the health of a community, including illness and early deaths, child and maternal health, access to health services and the supports needed to enable people to maintain independent lives.

- East Lothian has higher life expectancies for males and females when compared to Scotland.
- Tranent South intermediate zone has higher life expectancies for males and females when compared to East Lothian.
- Tranent North and Wallyford & Whitecraig have lower life expectancies for males and females when compared to East Lothian as whole.
- The variation in life expectancy across the ward’s intermediate zones is 4.7 for females and 3.7 years for males.
- Females life expectancy years was 4.3 years higher than male life expectancy in Tranent North, the highest difference of all the ward’s intermediate zones.

Table 17 – Life Expectancy (Scotpho)

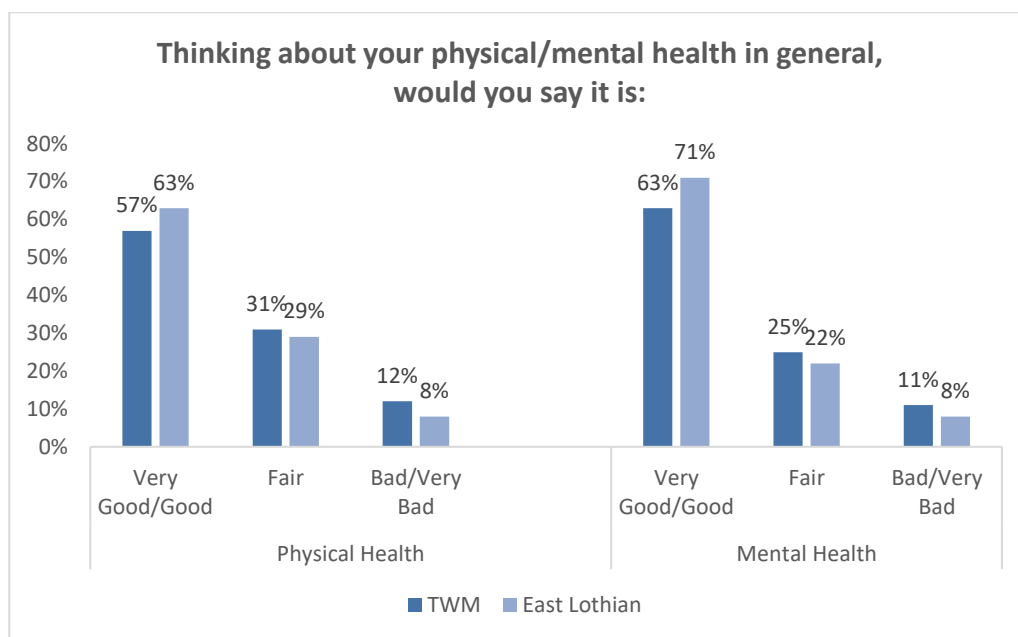

IZ:2017 to 2021 (5 year aggregate). East Lothian & Scotland:- 2020 to 2022 (3 year aggregate)

| Life Expectancy (IZ) | Tranent North | Tranent South | Wallyford and Whitecraig | East Lothian | Scotland |
|----------------------|---------------|---------------|--------------------------|--------------|----------|
| Female | 80.5 | 83.7 | 79.0 | 82.4 | 80.7 |
| Male | 76.2 | 79.9 | 77.2 | 78.7 | 76.5 |

Across this ward the majority of people (57%) described their physical health as Very Good/Good, compared with the East Lothian figure of 63%.

63% of respondents in this ward stated their mental health as very good/good (East Lothian 71%).

Figure 14 - Self-assessment of Health (East Lothian Residents Survey 2024)

Illness, Mortality and Hospital Admissions

- Table 18 shows that East Lothian had lower hospital admissions than Scotland for the listed categories.
- With the exception of CHD in Wallyford & Whitecraig, all hospital admissions in the TWM ward intermediate zones were above the East Lothian average.

Table 18 - Hospital Admissions (Scotpho)

Alcohol stays (2021/2022), COPD (2019/20), CHD(2019/20), Asthma (2019/2020)

| Hospital admissions per 100,000 people (age standardised) | Wallyford and Whitecraig | Tranent North | Tranent South | East Lothian | Scotland |
|-------------------------------------------------------------------------|--------------------------|---------------|---------------|--------------|----------|
| Alcohol-related hospital admissions | 467.0 | 551.6 | 537.7 | 437 | 611.1 |
| Patients hospitalised with chronic obstructive pulmonary disease (COPD) | 340.6 | 155.6 | 201.6 | 145.1 | 207.5 |
| Coronary heart disease (CHD) patient hospitalisations | 215.2 | 302.0 | 370.4 | 265.7 | 341.6 |
| Asthma patient hospitalisations | 104.5 | 96.5 | 92.2 | 67.9 | 68.4 |

SIMD Health Domain

The health domain identifies areas with a higher than expected level of ill health or mortality given the age-sex profile of the population.

The Health Domain gives a Health deprivation rank using the following indicators:

- Standardised Mortality Ratio
- Hospital Episodes Related to alcohol use
- Hospital Episodes Related to drug use
- Comparative Illness Factor
- Emergency admissions to hospital
- Proportion of population being prescribed drugs for anxiety, depression or psychosis
- Proportion of live singleton births of low birth weight

The following table summarises the results of some of these indicators for the data zones in the TWM ward.

- No data zones in the ward are within the 20% most deprived in terms of the SIMD2020 Health domain in Scotland.
- 5 data zones are within the 20% least Health deprived in Scotland, 2 of which are within the 10% least Health deprived in Scotland.

TWM Data zones – ordered by Health Domain ranking

[Scottish Index of Multiple Deprivation 2020 - gov.scot](#)

Early deaths across the ward are illustrated below in Figure 15.

- Early Deaths from cancer and CHD were lower in East Lothian when compared to Scotland as a whole.
- There is a higher incidence of early death from cancer in Tranent North and Tranent South when compared to the East Lothian average.
- There is a higher incidence of early death from CHD in Wallyford & Whitecraig when compared to East Lothian.

Figure 15 - Early deaths / 100,000 (ScotPHO – 2019 to 2021 3 year aggregate)

[ScotPHO profiles \(shinyapps.io\)](#)

Maternity and Child Health

The 2022 Scotland Census showed that 1,141 children aged 0 – 4 years are living in the TWM ward, which is 5.5 % of the ward's population, higher than the East Lothian figure of 4.9%.

- Maternal and child health data in East Lothian is better than the Scottish averages in all categories with the exception of healthy birth weight.
- Healthy birth weight is higher in all of this ward's intermediate zones when compared to East Lothian as a whole.
- The percentage of babies breastfed, and of children with a healthy P7 weight is lower in all this ward's intermediate zones when compared to East Lothian as a whole.

Table 20 - Breastfed (18/19 TO 20/21), Child dental health (22/23), healthy birth weight(20/21) (ScotPHO – Community Health and Well-being Profile)

| TWM (IZ's) | Wallyford and Whitecraig | Tranent North | Tranent South | East Lothian | Scotland |
|-----------------------------------------------|--------------------------|---------------|---------------|--------------|----------|
| Babies exclusively breastfed at 6-8 weeks (%) | 26.4 | 30.8 | 31.1 | 37.8 | 31.8 |

Young people's attitudes to health

In the 2023/24 Students Evaluation of Experience Survey:

- Tranent schools had higher rates than the East Lothian average for all questions and years, with the exception of the P6 scores for "People at school help me to make healthy choices", "In school, I can learn about healthy relationships including about friendships" and "I am able to get information about my physical health in East Lothian"

Table 21 - Young People's attitudes to health (2023/24 Student Evaluation of Experience Survey)

| | P6 | 86.3% | 86.7% | 81.0% | 73.6% | 81.5% | 90.4% | 82.8% |

Care and Social Care

As an indication of the level of voluntary work undertaken, information from the 2011 census for the old Fa'side ward has been shown below

- Across this ward 2,530 people (or 12% of the population) provide unpaid care to a friend or family member.
- 26% of these carers were providing more than 50 hours of care per week.

Figure 16 – Voluntary hours of care provided (Scotland's Census 2022)

Older people

Older people make up a growing segment of the population. The 2018 based population projection shows that the 15.1% of the population in this ward were aged 65 and over, and 6.7% were aged 75 and over in 2018, this is projected to increase to 19.0% and 8.3% respectively in 2030.

In 2022, East Lothian had an estimated 2104 people with dementia. Of those diagnosed in 49% were aged between 75-84, with 58% living in the West of the county, and 42% in the East. Statistics also indicated that, in line with national trends, there is a higher prevalence of dementia in women, than in men.

East Lothian Health and Social Care Partnership has developed a dedicated dementia strategy providing a clear strategic framework to improve the offer and provision of dementia services across East Lothian in line with local need.

The strategy sets out the needs and intended actions to help support people living with dementia and their families covering information provision, diagnosis and post diagnostic support, dedicated support for carers, expanding community connections, maintaining independence, transport, housing, staying safe and understood as well as care services and end-of-life care.

[East Lothian launches dedicated dementia strategy | East Lothian Council \(East Lothian Council\)](#)

- There is a day centre in the ward: Tranent Day Centre which offers 90 full day places per week for older people, benefitting an average of 65 people per week in each area.
- There are also two Lunch Clubs running across the area – in Macmerry on a Monday offering 6 places, and in Pencaitland on Wednesdays which, offering longer day activities, can attract up to 45 people each week.

Table 22 – Population Projections for Older People (2018 based ward population projections (Improvement Service))

| TWM Ward | 2018 | 2020 | 2022 | 2024 | 2026 | 2028 | 2030 |
|-----------------------------------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|
| 65 and over | 3,320 | 3,475 | 3,695 | 3,901 | 4,144 | 4,422 | 4,678 |
| 75 and over | 1,472 | 1,549 | 1,678 | 1,786 | 1,884 | 1,950 | 2,046 |

[Sub-Council Area Population Projections | Improvement Service](#)

Neighbourhood and Place

The rural nature of much of East Lothian means that the majority of the population live in geographically distinct towns and villages – each with their own strengths and differing needs.

While each of the East Lothian wards is geographically clustered around one of six major towns it does mean that people across the county do have different levels of access to local services and facilities. These variations not only impact on local quality of life and the opportunities available to local residents but also on the strength and resilience of local communities, as how people feel about their own neighbourhoods can also influence how much they choose to become involved.

HEADLINES – Neighbourhood and Place

- The 2024 East Lothian Residents Survey showed that 85% of people in the TWM ward rated their neighbourhood as a ‘fairly good’ or ‘very good’ place to live.
- Road and pavement repair was the top priority for improvement in the TWM ward and across East Lothian as a whole.
- 7% of respondents in the ward felt that they could influence decisions in their local area compared to 12% for East Lothian as a whole.
- 52% reported that they would like to be more involved in Council decisions affecting their area, less than the 49% across East Lothian as a whole.

The East Lothian Residents Survey (2024) showed that 85% of respondents in the TWM ward thought their neighbourhood was a very/fairly good place to live, lower than the 93% across East Lothian as a whole.

Figure 17 - Perception of their neighbourhood (East Lothian Residents Survey 2024)

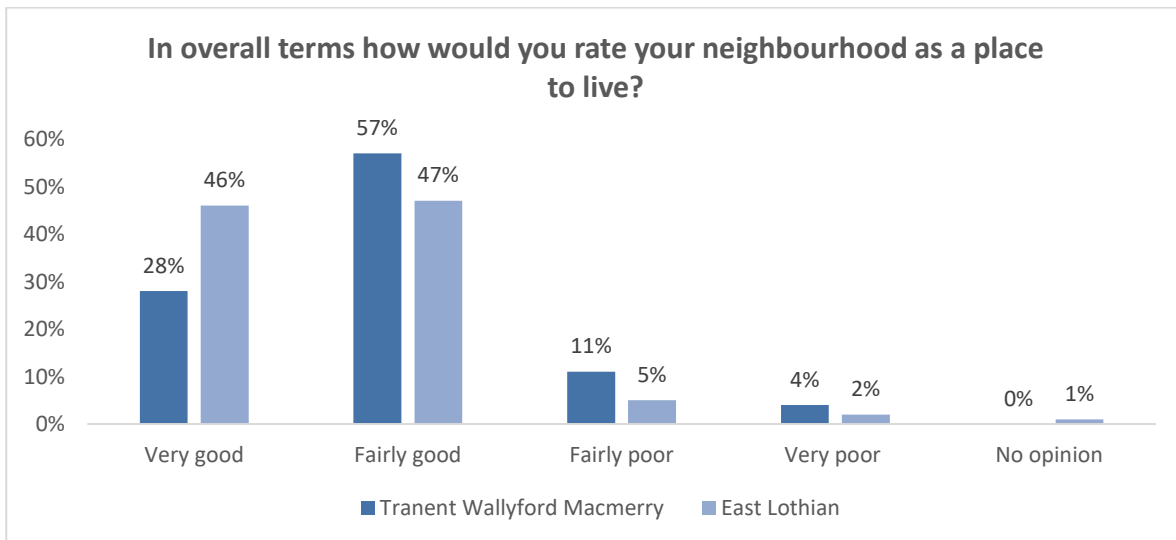

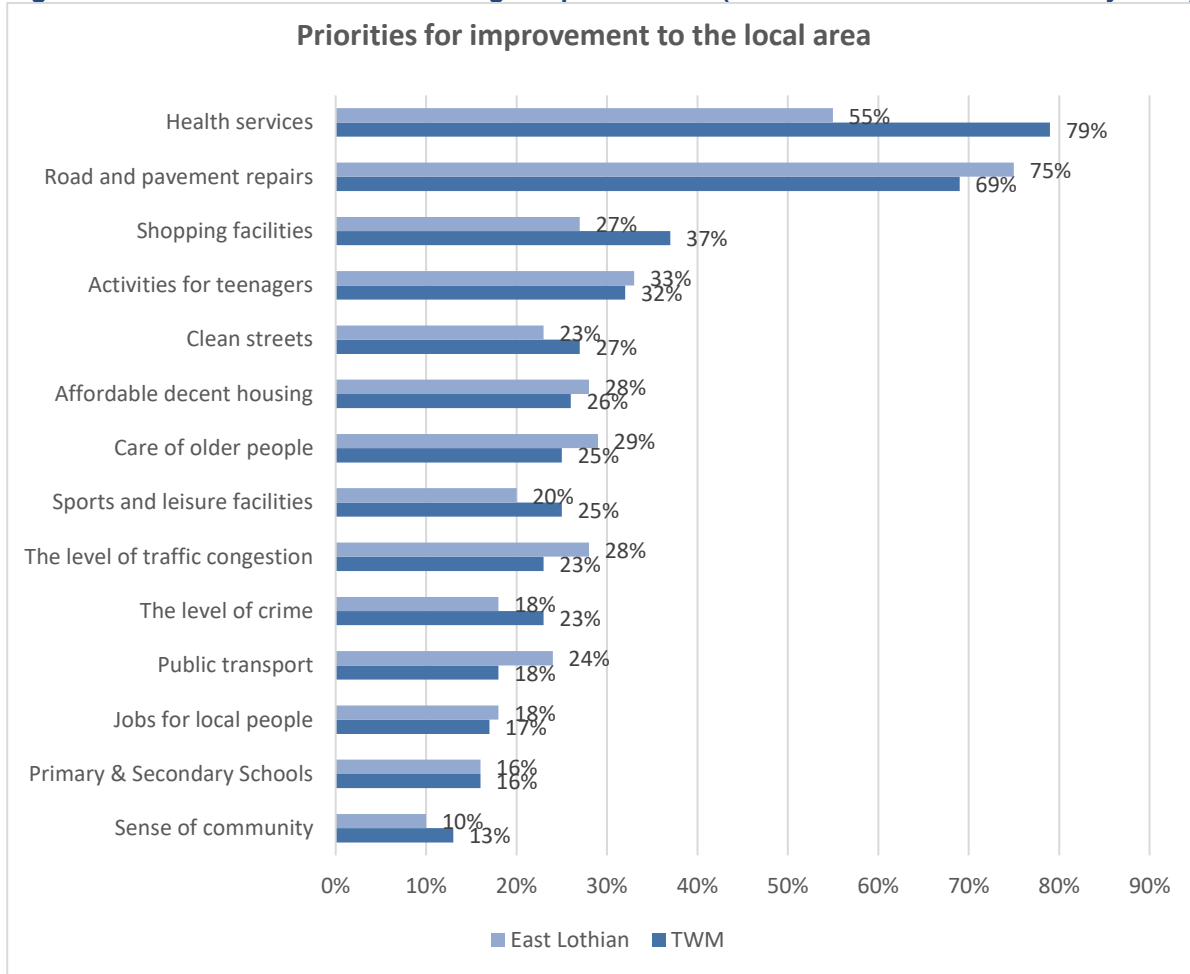

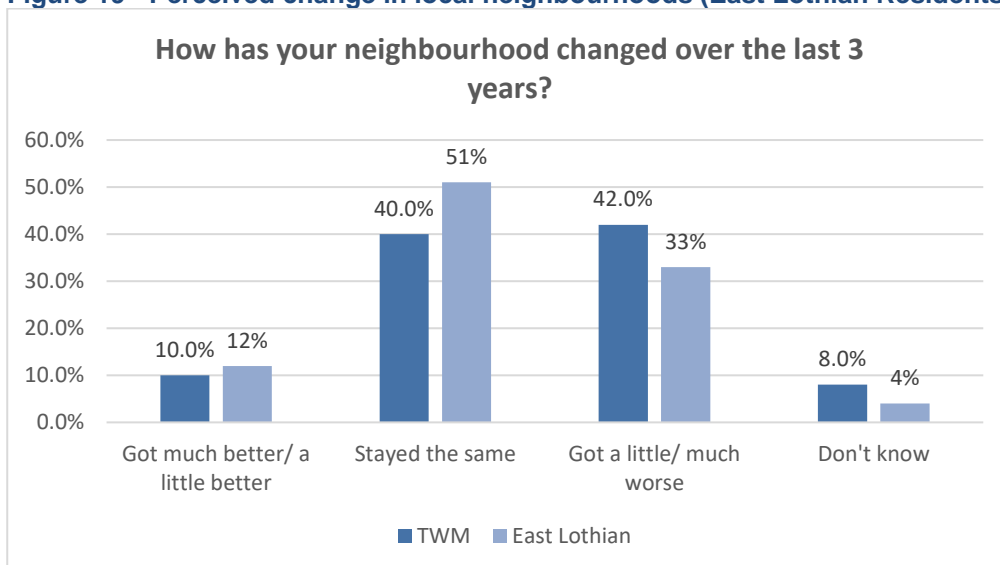

Figure 18 below shows that road and pavement repairs was the top priority for improvement in the TWM ward and across East Lothian as a whole. 55% of East Lothian respondents stated health services was a priority compared to 79% in the TWM ward. Sense of community was the lowest priority for the TWM ward and East Lothian.

Figure 18 - What makes somewhere a good place to live (East Lothian Residents Survey 2024)

The East Lothian Residents’ Survey (2024) also asked people how they felt their neighbourhood had changed over the last 3 years. Less people in this ward stated that things had stayed the same or got better than across East Lothian as a whole.

Figure 19 - Perceived change in local neighbourhoods (East Lothian Residents Survey 2024)

Local High Streets

Each of East Lothian’s wards is centred around a main town which is expected to provide retail and other key services to the community.

Vacancy rates (measured as a percentage of available retail units in the area) are a key indicator of the ‘health’ of local High Streets.

Figure 20 - Town Centre Vacancy Rates (Local Development Plan 2 – Town Centres and Retailing Issue No.16 East Lothian Council)

Pedestrian counts are undertaken annually in each town centre to establish weekly footfall rates for East Lothian’s High Streets. The observations are November based and are not reflective of seasonal differences.

Figure 21 – Town Centre Footfall (Local Development Plan 2 – Town Centres and Retailing Issue No.16 East Lothian Council)

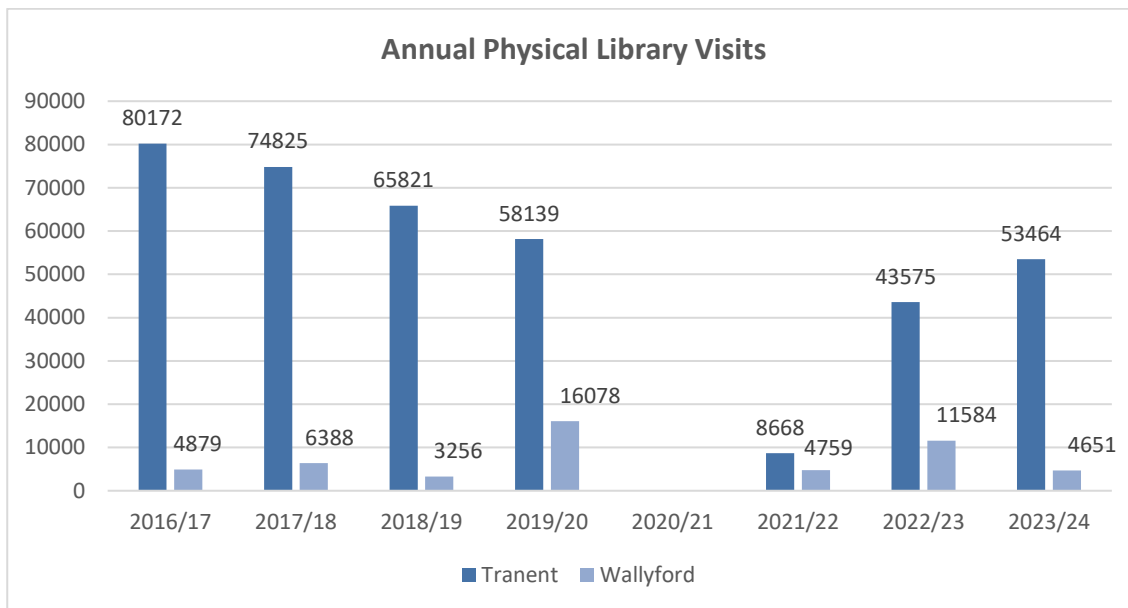

Library Visits

There are two East Lothian Council Libraries located across the TWM ward – Tranent Library and Wallyford Library. East Lothian Council’s usage figures show that:

- Despite increasing over the last 3 years, visits to Tranent Library are below the pre covid levels, with the 53,464 visits in 2023/24 being 41% lower than the 58,139 in 2019/20.
- Opening hours were reduced in a number of smaller libraries in 2023/24, and Wallyford Library was closed for a number of months to move to a new location.

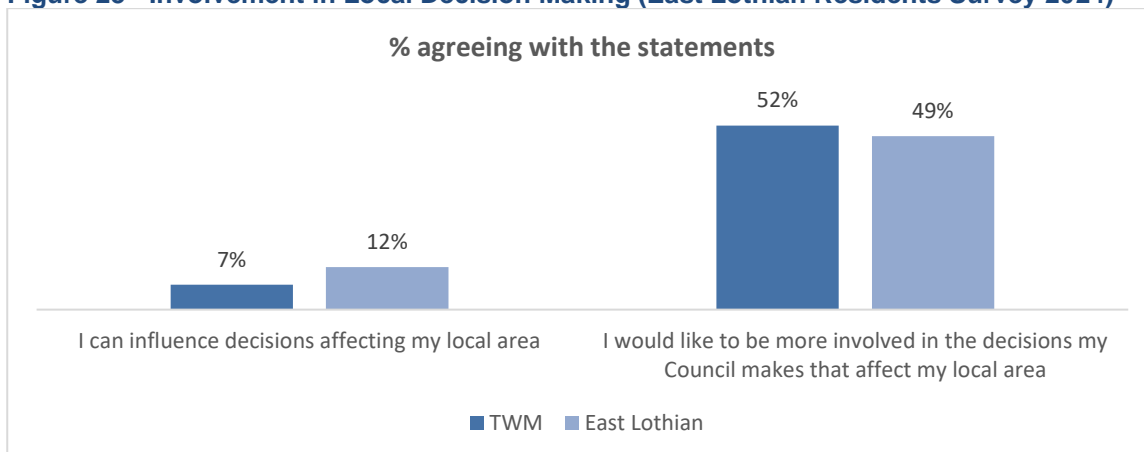

Figure 22 - Annual library physical visits (East Lothian Council)

Participating in Decisions

The East Lothian Residents Survey (2024) asked how people felt about their ability to be involved in decisions that affect their local area. 7% of respondents in the ward felt that they could influence decisions in their local area, less than the 12% for East Lothian as a whole. 52% reported that they would like to be more involved in Council decisions affecting their area, more than the 49% across East Lothian as a whole.

Figure 23 - Involvement in Local Decision Making (East Lothian Residents Survey 2024)

Housing

HEADLINES – Housing

- There were 8,599 dwellings in the TWM ward, equal to 17.6% of the total number of dwellings across East Lothian.
- There are more semi detached and terraced houses in this ward when compared to East Lothian as a whole
- The median house price in this ward was below the East Lothian average.
- More houses in this ward had two or three bedrooms when compared to East Lothian as a whole.

The Scottish Government’s Urban Rural Classification system provides a standard way of defining different urban and rural settings and measuring the percentage of the population living within each. Figure 24 shows that more people reside in other urban areas when compared to East Lothian.

Figure 24 - Urban / Rural Classification (National Records of Scotland)

[Supporting documents - Scottish Government Urban Rural Classification 2020 - gov.scot \(www.gov.scot\)](http://www.gov.scot)

- *Large Urban Areas Settlements of 125,000 people and over.*
- *Other Urban Areas Settlements of 10,000 to 124,999 people.*
- *Accessible Small Towns Settlements of 3,000 to 9,999 people, and within a 30 minute drive time of a Settlement of 10,000 or more.*
- *Remote Small Towns Settlements of 3,000 to 9,999 people, and with a drive time of over 30 minutes to a Settlement of 10,000 or more.*
- *Accessible Rural Areas Areas with a population of less than 3,000 people, and within a 30 minute drive time of a Settlement of 10,000 or more.*
- *Remote Rural Areas Areas with a population of less than 3,000 people, and with a drive time of over 30 minutes to a Settlement of 10,000 or more.*

Housing Type

There were 8,599 dwellings in the PSG ward, equal to 17.6% of the total number of dwellings across East Lothian. (Scotland’s Census 2022). There are more semi detached and terraced houses in this ward when compared to East Lothian as a whole.

Figure 25 - Housing Type (Scotland's Census 2022)

[Search | Scotland's Census - Search by topic \(scotlandscensus.gov.uk\)](https://scotlandscensus.gov.uk)

98% of the dwellings were occupied in this ward.

Table 23 - Occupied/Vacant dwellings and Second homes 2023

| Ward | Occupied dwellings | Vacant dwellings | Second homes |
|-------------------------------|--------------------|------------------|--------------|
| Dunbar & East Linton | 97% | 2% | 1% |
| Haddington & Lammermuir | 97% | 2% | 0% |
| Musselburgh | 97% | 2% | 0% |
| North Berwick Coastal | 93% | 3% | 4% |
| Preston Seton Gosford | 98% | 2% | 0% |
| Tranent, Wallyford & Macmerry | 98% | 2% | 0% |
| East Lothian | 97% | 2% | 1% |
| Scotland | 96% | 3% | 1% |

Council tax bands are based on the value of the dwelling (from Band A with the lowest value to band H having the highest value).

- Across East Lothian there are significantly more dwellings in the upper Council tax bands than across Scotland as a whole.
- In the TWM ward there are more dwellings in lower Council tax bands when compared to East Lothian as a whole.

Table 24 – Dwellings by Council Tax Band (National Records of Scotland)

| % of Dwellings by Council tax band (2023) | | | | |
|-------------------------------------------|--------------|--------------|--------------|-----------------|
| Ward | Bands A-C | Bands D-E | Bands F-H | Total Dwellings |
| Dunbar and East Linton | 44.2% | 28.2% | 27.6% | 100.0% |
| Haddington and Lammermuir | 46.3% | 26.7% | 27.0% | 100.0% |

Central Heating

Figure 29 shows that more households in this ward had gas central heating when compared to East Lothian and Scotland as a whole.

Figure 29 Type of Central Heating (Scotland's Census 2022)

[Search | Scotland's Census - Search by topic \(scotlandscensus.gov.uk\)](https://scotlandscensus.gov.uk)

Fuel Poverty

A household is considered to be in fuel poverty if :-

- More than 10% (20% for extreme fuel poverty) of net income is required to pay for their reasonable fuel needs after housing costs have been deducted.
- The remaining household income is not enough to maintain an acceptable standard of living, defined as at least 90% of the UK Minimum Income Standard (MIS) once childcare costs and disability or care benefits are deducted.

The Fuel Poverty (Targets, Definition and Strategy) (Scotland) Act 2019 made provisions for 2040 fuel poverty targets:

- no more than 5% of households in Scotland are in fuel poverty
- no more than 1% of households in Scotland are in extreme fuel poverty
- the median fuel poverty gap of households in Scotland in fuel poverty is no more than £250 adjusted in accordance with section 5(5) to take account of changes in the value of money

Properties in rural areas are less energy efficient than those in an urban area with 65.8% banded EPC D or below. Properties in rural areas are less likely to be on the gas grid, reducing their energy efficiency and increasing their energy bills. 36% of homes in 'accessible rural areas' are off the mains gas grid and 13.2% of households are heated with oil.

23% of households in the Fa'side Area Partnership are classed as fuel poor, similar to the 24% across East Lothian and Scotland as a whole.

East Lothian Local Housing Strategy [Approved LHS 2024_2029.pdf](#)

Table 26 – Fuel poor Households by Tenure and Household Type (Scottish House Condition Survey 2017–2019)

| | % of Households Fuel Poor | | | | | | |
|--------------|---------------------------|----------------|----------------|----------------|----------------|----------|-------|
| | % of LA | Tenure | | | Household type | | |
| | | Owner-occupied | Social Housing | Private Rented | Older | Families | Other |
| East Lothian | 24% | 16% | 42% | * | 36% | 15% | 20% |
| Scotland | 24% | 16% | 38% | 37% | 27% | 17% | 27% |

In East Lothian, post 1945 households, “houses,” and 3+ bedroom households were more likely to be fuel poor.

Table 27 – Fuel poor Households by Household Attribute (Scottish House Condition Survey 2017–2019)

| | % of Households Fuel Poor | | | | | |
|--------------|---------------------------|-----------|---------------|------|--------------------|-----|
| | Age of dwelling | | House or flat | | Number of bedrooms | |
| | Pre-1945 | Post 1945 | House | Flat | 2 or fewer | 3+ |
| East Lothian | 20% | 26% | 27% | 15% | 23% | 25% |
| Scotland | 26% | 24% | 21% | 30% | 29% | 20% |

Homelessness

In 2023/24, there were 645 households that were assessed as homeless or threatened with homelessness in East Lothian. This equates to 130 per 10,000 households, which is similar to the national rate of 133.

Figure 30 – Households assessed as homeless per 10,000 households (Scot.Gov)

[Homelessness statistics - gov.scot](https://www.gov.scot/homelessness-statistics)

In 2023/24, there were 354 households in temporary accommodation in East Lothian. This is 71 per 10,000 households, which is higher than the national average of 64. Edinburgh, West Lothian, East Lothian and Midlothian have the 1st, 3rd, 5th and 7th highest rates in Scotland.

Figure 31 – Number of Households in Temporary Accommodation per 10,000 households (Scot.Gov)

Crime and Safety

East Lothian is a relatively safe place to live, with levels of serious crime and disorder that are significantly below the Scottish average. However crime, anti-social behaviour and the fear of crime can undermine community cohesion and have an impact upon local people’s quality of life. This section therefore focuses not only on official crime statistics but also on how people feel about the safety of their area.

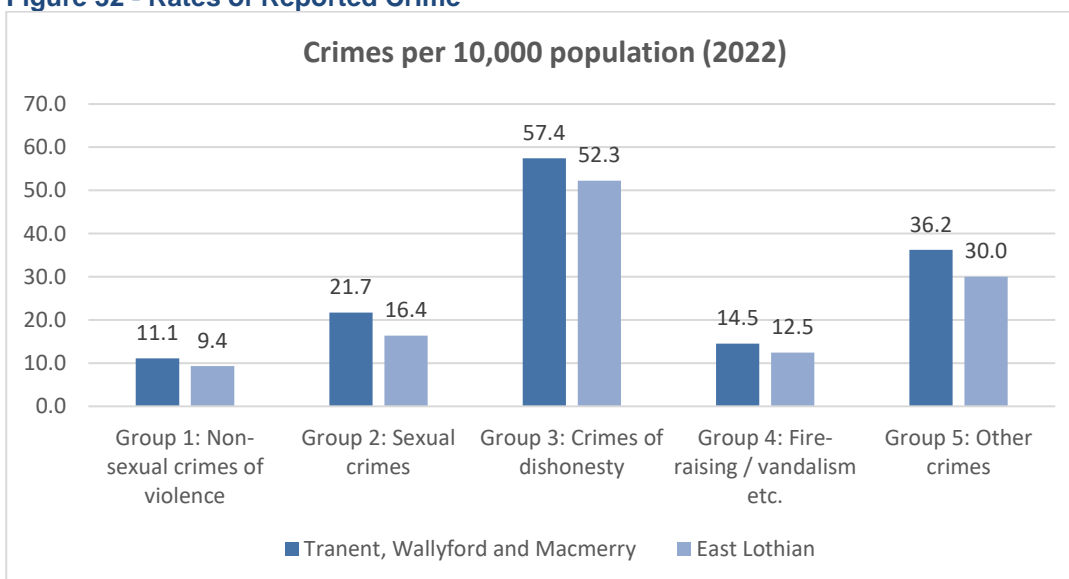

HEADLINES – Crime and Safety

- Crime levels in the TWM ward in 2022 were above the East Lothian rate for all crime groups.
- 3 data zones in this ward were within the 20% most affected by the SIMD 2020 crime categories in East Lothian or Scotland.
- 32% of adult residents in the ward felt threatened by crime “A great deal/A fair amount”, higher than the 22% across East Lothian as a whole.
- 64% of residents reported that they felt safe walking alone after dark in their area “a great deal or a fair amount, compared to 72% for East Lothian as a whole.
- The majority of respondents in this ward (77%) said that seeing police officers in the community makes them feel safer, higher to the 69% for East Lothian.
- The TWM ward had the highest number of non accidental fires in East Lothian. The number of accidental fires in this ward was below the East Lothian average.

Reported crimes in the Ward

Figure 32 shows the level of crimes in the TWM ward in 2022 were above the East Lothian figure for all crime groups.

Figure 32 - Rates of Reported Crime

[East Lothian Council Ward Crime Map - Scotland's data on a map \(datamap-scotland.co.uk\)](https://datamap-scotland.co.uk)

Crime Domain

The SIMD Crime Domain is based on the following factors: Recorded SIMD crime rates for domestic house breaking, drug offences, common assault, crimes of violence, vandalism and sexual offences.

Across East Lothian there are communities that do experience a higher than average volume of crime and anti-social behaviour, particularly within more deprived areas and in town centres.

- 3 data zones in the ward are within the 20% most affected by SIMD crime categories in Scotland, 1 of which is in the 10% most deprived in Scotland in the SIMD crime category.
- 1 data zone is in the 20% least deprived in East Lothian and Scotland in the SIMD crime category.

Table 28 - TWM Data Zones ranked by SIMD Crime Domain

[Scottish Index of Multiple Deprivation 2020 - gov.scot](https://gov.scot)

Fear of Crime

People’s fear of crime does not always reflect the actual rate of crime occurring in their local areas. The East Lothian Residents Survey (2024) asked residents – ‘To what extent do you feel threatened by crime in your neighbourhood these days?’

Figure 33 shows that 32% of respondents felt threatened by crime “A great deal/A fair amount” higher than the 22% across East Lothian as a whole.

Figure 33 - Perceived Threat of Crime in Local neighbourhoods (East Lothian Residents Survey 2024)

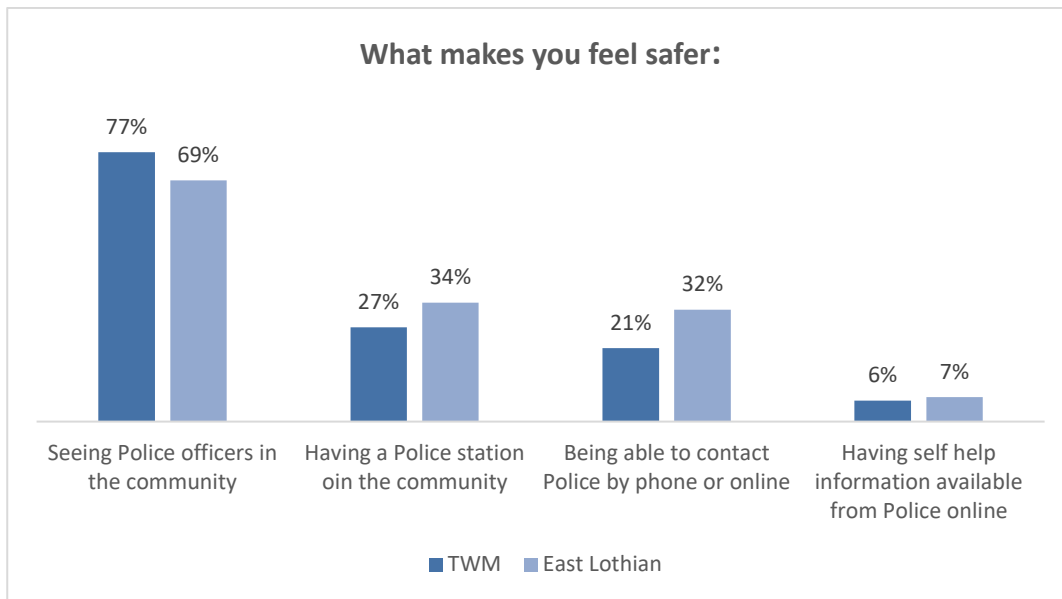

The East Lothian Resident Survey (2024) asked residents how safe they felt walking alone at night in their neighbourhood. 64% of respondents in this ward reported that they felt safe “a great deal or a fair amount, lower than the 72% across East Lothian as a whole.

Figure 34 - Perceptions of Safety after dark (East Lothian Residents Survey 2024)

The East Lothian Residents Survey 2024 asked residents what makes them safer. The majority of respondents in this ward (77%) said that seeing police officers in the community makes them feel safer, higher than the 69% for East Lothian.

Figure 35 – What makes you feel safer? (East Lothian Residents Survey 2024)

Anti-Social Behaviour

Anti-social behaviour (ASB) covers a range of incidents reported to the police and East Lothian Council’s ABS Hotline.

Across all wards there was a total of 876 ASB complaints to the council during the period 01/10 2023 to 31/03/2024, 48% were in relation to noise, 14% youths, 11% drug misuse and 27% other.

The ward breakdown in Figure 36 shows that Musselburgh had a higher % of complaints relative to its share of the East Lothian population, with Haddington & Lammermuir, Dunbar & East Linton and North Berwick Coastal having a lower percentage of complaints.

Figure 36 – ASB Complaints by ward (East Lothian Council) and population (Scotland’s Census 2022)

Fire incidences across the ward

Across East Lothian around 100 uniformed and support staff are employed by the Fire and Rescue Service within 6 community fire stations based at Musselburgh, East Linton, North Berwick, Tranent, Dunbar and Haddington.

- The number of accidental fires has remained at a similar level other than the decrease in 2020/21
- The number of non accidental fires were at a lower level in 2020/21 and 2021/22, before increasing to pre Covid levels in 2022/23

Figure 37 - Incidences requiring Fire Service attendance

statistics.gov.scot

Figure 38 shows the number of fires per 10,000 population in East Lothian in 2022/23

- East Lothian had a lower number of accidental and non accidental fires when compared to Scotland.
- The TWM ward had the highest number of non accidental fires in East Lothian. The number of accidental fires in this ward was below the East Lothian average.

statistics.gov.scot

Transport and Travel

HEADLINES – Transport and Travel

- 30.5% of people in this ward work from home, lower than the East Lothian figure of 33.9%.
- 48.6% of commuters in this ward drive to work higher than the East Lothian (44.5%)
- 24.3% of commuters in this ward travelled between 10km to less than 20 km to their place of work or study, higher than the East Lothian figure of 16.2%.
- 2 data zones in this ward are in the 20% most access deprived in Scotland.

The East Lothian Residents Survey 2021 showed that 91% of respondents in the ward had a car/light van in the household, the same as the figure for East Lothian as a whole.

Figure 39 – Do you have a car/light van in household? (East Lothian Residents Survey 2021)

Figure 40 shows that a lower percentage of people in this ward worked from home than across East Lothian as a whole. Driving a car/van was the most common mode of transport in the TWM ward (48.6%) higher than the East Lothian average of 44.5%. More people in this ward commuted by bus when compared to East Lothian.

Figure 40 - Main Method of Commuting to Work (Scotland's Census 2022)

[Search | Scotland's Census - Search by location \(scotlandscensus.gov.uk\)](https://www.scotlandscensus.gov.uk)

Figure 41 shows that:-

- 24.3% of commuters in this ward travelled between 10km to less than 20 km to their place of work or study, higher than the East Lothian figure of 16.2%, suggesting that these commuters travel to Edinburgh.
- 30.5% of people worked from home (East Lothian 33.9%).
- 48.6% of commuters in this ward drive to work (East Lothian 44.5%).
- 16.7% of people had no fixed workplace or worked out with the UK, higher than the 14% across East Lothian 14.0%.

Access Deprivation

SIMD Geographic Access Domain

This domain is intended to capture the issues of financial cost, time and inconvenience of having to travel to access basic services, and is based on travel time to 6 key services

It consists of two sub-domains, one for public transport journeys and one for journeys made by private car. This accounts for the fact that not everyone will have access to a

- 2 data zones are in the 20% most access deprived in Scotland.
- 3 data zones are in the 20% least access deprived in Scotland, one of which is in the 10% least access deprived in Scotland.

Environment

HEADLINES – Environment

- 75% of respondents in the ward (East Lothian 77%) reported that they understood what action they should take to help tackle climate control.
- 54% of respondents in the ward (East Lothian 61%) reported that cheaper bus or train fares would definitely encourage them to address their impact on climate change.

Climate Change

Table 30 shows that 75% of respondents in the ward reported that they understood what action they should take to help tackle climate control, similar to the 77% for East Lothian as a whole.

Table 30 – Perceptions of climate change (East Lothian Survey 2024)

| To what extent do you agree/disagree with the following statements? | Agree/Disagree | TWM | East Lothian |
|----------------------------------------------------------------------------------------------|----------------|-----|--------------|
| It's not worth me doing things to help the environment if others don't do the same | % agree | 24% | 22% |
| | % disagree | 64% | 67% |
| I don't believe my behaviour and everyday lifestyle contribute to climate change | % agree | 30% | 25% |
| | % disagree | 48% | 58% |
| Climate change will only have an impact on other countries, there is no need for me to worry | % agree | 4% | 5% |
| | % disagree | 83% | 87% |
| I understand what actions people like myself should take to help tackle climate control | % agree | 75% | 77% |
| | % disagree | 13% | 12% |

Figure 42 shows that 63% of respondents in the ward (East Lothian 49%) reported that more neighbourhood facilities such as shops would definitely encourage them to address their impact on climate change, the highest of all options. On the other hand only 22% in the ward (East Lothian 25%) said that more electric charging points would definitely encourage them to address their own impact on climate change.

Figure 42 –Impact on climate change (East Lothian Residents Survey 2024)

CO2 Emissions

Figure 43 shows that, in East Lothian between 2013 and 2022 there was a 23% decrease in the overall CO2 emissions, compared to a Scottish decrease of 31%. The East Lothian figure is consistently higher than the Scottish rate for areas that do not fall under the influence of East Lothian Council.

For areas that are within the influence of the Council, East Lothian has a similar level to that of Scotland. The East Lothian rate fell by 29% between 2013 and 2022, compared to 33% across Scotland as a whole.

Figure 43: CO2 Emission estimates per capita (tonnes per capita) in East Lothian and Scotland (UK Government)

[UK local authority and regional greenhouse gas emissions statistics - GOV.UK](https://www.gov.uk/government/statistics/uk-local-authority-and-regional-greenhouse-gas-emissions-statistics)

Perceptions of East Lothian Council & Satisfaction with Services

HEADLINES – Perceptions of East Lothian Council & Satisfaction with Services

- 32% of respondents in the TWM ward felt that the council provided a high quality service, the lowest percentage of all six wards.
- Residents in this ward expressed notably lower levels of satisfaction for GP services, Parks & Gardens, Swimming Pools/Sports Centres, Opticians, Street Cleaning and Hospital Outpatient services when compared to East Lothian as a whole.

The East Lothian Residents Survey showed that 32% of respondents in the TWM ward felt that the council provided a high quality service, the lowest figure of all six wards.

Figure 44 - % of respondents agreeing that ELC provides a high quality service (East Lothian Residents Survey 2024)

Respondents were also asked whether they agreed with a range of statements about the Council. Dunbar & East Lothian residents were most likely to agree that they would like to be more involved in council decisions affecting their area and least likely to feel they could influence decisions affecting their local area (as shown in Figure 78).

Figure 45 - Level of Agreement with statements about ELC (East Lothian Residents Survey 2024)

The survey also asked people about their level of satisfaction with the East Lothian Council Services they used. Residents in this ward expressed notably lower levels of satisfaction for GP services, Parks & Gardens, Swimming Pools/Sports Centres, Opticians, Street Cleaning and Hospital Outpatient services when compared to East Lothian as a whole.

Figure 46 - Satisfaction with Council Services (East Lothian Residents Survey 2024)
