

Fa'side Area Partnership

DRAFT Area Plan 2015-2023

The East Lothian Partnership is working towards 10 strategic outcomes that together contribute to creating “an East Lothian where everyone has the opportunity to lead a fulfilling life and which contributes to a fair and sustainable future.”

After looking at the evidence and working with residents and stakeholders across this local community the Fa'side Area Partnership has identified 9 priority areas for action across the three strategic objectives of the East Lothian Plan which will help deliver these outcomes locally.

The priorities are supported by an Action Plan which details how the Area Partnership will work with public services, voluntary sector agencies, communities and local people to achieve each priority's outcomes; priorities that focus on the real differences we want to make.

Strategic Objective: Sustainable Economy

Our 3 priority areas for action are:

- 1. Improving our Town and Villages**
- 2. Supporting a thriving local economy**
- 3. Improve travel options and reduce traffic congestion throughout the ward**

Strategic Objective: Resilient People

We want to improve opportunities for people across our ward to choose to live a healthy life-style.

Our 3 priority areas for action are:

- 4. Increasing opportunities for physical activity in day to day life**
- 5. Supporting families to create healthy environments for children**
- 6. Making it easier to choose healthy and locally grown food**

Strategic Objective: Safe and Vibrant Communities

Our 3 priority areas for action are:

- 7. Improving Community information, facilities and resources**
- 8. Ensuring all Residents of Fa'side feel Safe and Secure in their Community**
- 9. Becoming a more supportive and inclusive community**

Sustainable Economy across Fa'side ward

PRIORITY 1 – Improving our Town and Villages

The difference we want to make	Why is this important in this area:
<p>We want to ensure that our towns and villages are appealing and thriving places with a variety of great public spaces for people of all ages to enjoy where:</p> <ul style="list-style-type: none"> - Our civic spaces, parks and other community areas throughout the ward are attractive, welcoming and accessible - Each village in the ward has a central civic space that provides a casual meeting place for local residents - Civic Square is enhanced and plays a vital role as the heart of Tranent's public realm - Tranent Town Centre is revitalised so that it is safe and easy to access and can serve the whole of the Fa'side community as a hub of economic activity with excellent public spaces, good permeability to the High Street and a thriving local business sector 	<p>Publicly owned streets, pathways, right of ways, parks, publicly accessible open spaces and public buildings and facilities are key issues for improvement in Fa'side and particularly in Tranent Town Centre. Key concerns are Polson Park and other park spaces; Civic Square, and; the High Street. There are concerns that Tranent Town Centre is congested and is not accessible or pleasant for pedestrians resulting in less passing traffic on foot and a lack of vibrancy.</p> <p>There is also a need to ensure that the public spaces in the villages in the ward are enhanced to reach their full potential. Work being done to enhance Ormiston Park is welcome and there may be opportunities to enhance this, but there are concerns that public spaces in Elphinstone and Macmerry in particular could be improved.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 1: East Lothian has a growing sustainable economy 1.3 Our towns and villages are thriving and well-maintained places, where new development reflects their distinctive identity</p> <p>Outcome 8: East Lothian has high quality natural environments 8.2 We have quality, attractive green space that is valued and enhances the wellbeing of our communities</p>
<p>Goals under this Priority include:</p> <ul style="list-style-type: none"> • Creating a Fa'side Identity and making more of the area's history • Villages and neighbourhoods within Tranent have attractive, central public spaces where people can meet and gather • Revitalise public spaces within Tranent Town Centre to create a more pleasant atmosphere for visitors and locals

PRIORITY 2 – Supporting a thriving local economy

<p>The difference we want to make</p>	<p>Why is this important in this area:</p>
<p>We want to help generate a more robust and thriving economy in the Fa’side ward where:</p> <ul style="list-style-type: none"> - Income and employment inequalities across the ward are reduced. - Poverty and child poverty across the ward are reduced. - Where possible and appropriate work required delivering the Area Plan is carried out by local trades’ people to ensure money stays within the ward. - High quality broadband is available to allow businesses to function in rural areas. - An attractive Town Centre and a thriving High Street with lots of locally owned businesses ensure a strong local economy and a draw for visitors in Tranent. - We make the most of Fa’side attractions (eg, Glenkinchie/ Fa’side Tower/ Ormiston High St). 	<p>Some areas of Fa’side face significant economic challenges including high levels of poverty and child poverty, and there are significant financial inequalities across different areas of the ward. According to the Scottish Index of Multiple Deprivation (2012), the most deprived area of East Lothian is located in North West Tranent, and five other areas of Tranent are among the 20% most deprived areas of the county.</p> <p>There are concerns that Tranent has become a commuter town for Edinburgh and that there is a limited offering of facilities and businesses on the High Street and in the villages. Meanwhile some of the rural parts of the ward have poor broadband access which may be limiting local businesses.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 1: East Lothian has a growing sustainable economy 1.1 Our business sectors are growing</p>
<p>Goals under this Priority Include:</p> <ul style="list-style-type: none"> • Local Businesses receive the support they need to grow and provide high quality employment opportunities 	

DRAFT ACTION PLAN

<i>Priority</i>	<i>Action needed to achieve this</i>	<i>Timescales</i>	<i>Lead Group / Agencies Involved</i>	<i>Resources required</i>	<i>Current Stage</i>
***	<p>Support the development of the Tranent (or Fa'side) Business Association:</p> <ul style="list-style-type: none"> - Business Association would have a key role to play in the delivery of actions in the Tranent Town Centre Charrette, including supporting local trades people in carrying out work included in any 'Town Centre Strategy' or similar. 	1 yr	<p>Lead: Tranent Business Association</p> <p>Others: Fa'side Area Manager, Fa'side Area Partnership, Town Centre Sub-Group</p>		
	<p>Enhance skills and expertise within Fa'side to enable competitive tendering for Town Centre Conservation Area Regeneration contracts, as well as other pieces of work arising from the charrette:</p> <ul style="list-style-type: none"> - Most value from CARS and other investment in Tranent Town Centre if money spent with local businesses. - Supports local employment. - Money re-circulates within local economy providing knock-on benefit. (Tranent Town Centre Charrette) 	1-3 Yrs	<p>Lead: Fa'side Area Manager</p> <p>Others: Tranent Business Association, Fa'side Area Partnership, Town Centre Sub-Group</p>		
	<p>Establish superfast broadband availability in rural areas of ward:</p> <ul style="list-style-type: none"> - Enable more home working and small business set-up. - More competitive hospitality businesses. 	1-2 Yrs	<p>Lead: Haddington & Lammermuir/ Dunbar & East Linton Area Manager</p> <p>Others: Pencaitland CC, Fa'side Area Manager</p>	Support from Community Broadband Scotland	Active project in geographic scoping phase

DRAFT ACTION PLAN

PRIORITY 3 – Improve travel options and reduce traffic congestion throughout the ward

The difference we want to make	Why is this important in this area:
<p>We want to improve movement and congestion issues in Fa’side to create a ward where:</p> <ul style="list-style-type: none"> - Tranent town centre is safe and accessible for pedestrians and cyclists - Congestion of parking and carriageways in Tranent is eased for motorists. - Pragmatic parking provision and enforcement ensure parking is available where it is needed. - More people are walking and cycling, and less people are driving to access school, work and other facilities. - Access to public transport networks is improved and these networks are used by an increasing number of people. 	<p>Congestion and parking in Tranent town centre has been consistently raised as a key issue by the Area Partnership, and by community members and congestion on the high street is having a demonstrable impact on air quality in the town.</p> <p>In addition Fa’side residents are significantly more likely to access work and other key facilities in a car or van, and significantly less likely to walk, cycle or use public transport than the average across East Lothian. This is the case despite that fact that Fa’side is a relatively small ward, with a large urban population.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 3: Communities in East Lothian are able to adapt to climate change and reduced finite natural resources 3.2 People walk, cycle and use public and community transport more often, and travel less in cars.</p>
<p>Goals under this Priority Include:</p> <ul style="list-style-type: none"> • Congestions issues on the roads and car parks in Tranent Town Centre are improved • The overall volume of car traffic is reduced by making it easier for people to choose walking, cycling and public transport • Road and pedestrian safety in improved in all Fa’side villages and local neighbourhoods

Resilient People across Fa’side ward

We want to improve opportunities for people across our ward to choose to live a healthy life-style.

When the Fa’side Area Partnership started looking at health statistics for our ward we realised that the overall health outcomes for people living in this area were lower than many other places in East Lothian. In January 2015 members of the Partnership took part in a workshop focussing on Health Inequalities to begin to identify what could be done to improve health in the ward. We established a short term Working Group which looked at the ‘Challenges to Living a Healthy Life’ in this area.

Focussing on what it means to have a ‘healthy life-style’ in the widest context, we have identified 3 short term priority areas to address:

- Increasing opportunities for physical activity in day to day life
- Supporting families to create healthy environments for children
- Making it easier to choose healthy and locally grown food

PRIORITY 4 – Increasing opportunities for physical activity in day to day life

The difference we want to make	Why is this important in this area:
<p>We want to enable and encourage more people to be more physically active as part of their day-to-day lives, including:</p> <ul style="list-style-type: none"> - More people involved with sports, including young women & girls, and older men; - More people accessing work, school and other key facilities via active travel; - More people out enjoying parks, core paths and other green-spaces on a daily basis; - More opportunities for informal play at all ages. 	<p>Fa’side faces significant challenges in relation to health inequalities and some areas of the ward have high rates of hospitalisation for a range of illnesses related to a lack of physical activity. Many of these illnesses can also be significantly remediated by increased physical activity.</p> <p>Air quality is also an issues in Tranent and Fa’side has very high numbers of people accessing work, school and other facilities by car or van, with very few accessing these facilities by walking or cycling.</p> <p>Increasing opportunities for physical activity through sport, leisure, play and active travel could bring significant health benefits in for the Fa’side ward.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 6: In East Lothian, we live healthier, more active and independent lives</p> <p>6.3 People are more physically active</p>
<p>Goals under this Priority Include:</p> <ul style="list-style-type: none"> • Increase number of people choosing walking or cycling to access local facilities and using the core paths for leisure and recreation • Improve the quality of our outdoor spaces, and promote opportunities for informal outdoor play for people of all ages • Improve access to sports and sports facilities for all, but with a particular focus on young women and girls, and older men who are often less likely to participate

PRIORITY 5 – Supporting Families to create healthy environments for children

The difference we want to make	Why is this important in this area:
<p>We want to support families in Fa’side to give all children in the ward the best start in life possible, including:</p> <ul style="list-style-type: none"> - A positive and healthy pregnancy with reduced consumption of alcohol and nicotine and improved nutrition; - A happy and healthy infancy with good diet, time and opportunities for bonding and early development, and; - A happy, healthy and social primary age without disruptions to learning and development. 	<p>Fa’side as a whole scores below the East Lothian, and Scotland averages on a number of measures of maternal health including rates of smoking during pregnancy and rates of breastfeeding. There is a perception that previous attempts to improve these issues have been short lived, and to move forward effectively a sustained and locally led approach is required.</p> <p>There are also concerns that available employment opportunities in the ward eg shift working, as well as other factors such as the availability of personal computers and other devices, may be disrupting children’s sleep patterns, with knock on effects throughout school and later life.</p> <p>Finally the number of lone parent households in the ward is higher than the East Lothian average suggesting that there may be greater need for additional support.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 5: East Lothian’s children have the best start in life and are ready to succeed</p>
<p>Goals under this Priority Include:</p> <ul style="list-style-type: none"> • Ensure all Women have a Healthy and Positive Experience of Pregnancy and early motherhood • Ensure all children have healthy sleep patterns throughout their development • Increase parental involvement in all aspects of a child’s life and learning • Ensure parents have access to the support they need

PRIORITY 6 – Making it easier to choose healthy and locally grown food

The difference we want to make	Why is this important in this area:
<p>We want to ensure that everyone in the Fa’side ward has easy access to affordable healthy food and is fully equipped with the knowledge they need to prepare it for themselves and their families. In addition we want to involve the community to a much greater extent in the production of healthy food from growth to preparation by supporting community gardens, allotments and community food events.</p>	<p>The lack of healthy food options and abundance of fast food takeaways in some parts of the ward has been highlighted as a key priority by the Area Partnership, the Young Person’s Reference Group and members of the community on several occasions.</p> <p>Poor diet can cause High Cholesterol, High Blood Pressure, Obesity and Diabetes, all of which are risk factors for Coronary Heart Disease and Strokes. Residents of some parts of Fa’side are significantly more likely than across East Lothian to be hospitalised for both of these conditions.</p> <p>Improving access, and uptake, of healthy food in the ward could have significant positive impacts on the health and well-being of the Fa’side community.</p>
Related outcome in the East Lothian Plan	Outcome 6: In East Lothian, we live healthier, more active and independent lives

Safe and Vibrant Communities across Fa'side ward

PRIORITY 7 – Improving Community information, facilities and resources

The difference we want to make	Why is this important in this area:
<p>We want to ensure that Fa'side residents are able to access the information and facilities that they need to play an active and constructive role in their community. To do this we need to:</p> <ul style="list-style-type: none"> - Bring empty buildings and spaces back into use in a way that benefits the community. - Ensure the community are able to access existing facilities for a variety of purposes. - Establish a long term home for Recharge with enhanced facilities and space if possible. - Improve the availability of information about events, facilities and attractions for residents and visitors of Fa'side. 	<p>The theme "Community Facilities" was prioritised as the most important issue for the Fa'side ward by the Partnership, and has also been identified as a key issue by the young person's reference group and members of the community on many occasions.</p> <p>Tranent is currently the only town in East Lothian without a dedicated community centre and there are many unused or underused buildings and spaces within the Town Centre. In addition there are concerns about the limited facilities available in some of the villages, and the state that some of the existing facilities are in.</p> <p>There is also very limited online presence of the ward for community members, or for visitors. As all of the villages, but particularly Tranent, is growing and expected to continue growing, many of the ways people traditionally found out about activities etc in the area are no longer as effective. As new people move into the area we want to ensure that they are able to integrate well into the community and get involved and contribute to community life.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 10: East Lothian has stronger, more resilient, supportive, influential and inclusive communities</p> <p>10.1 Our third and community sectors are thriving and resilient</p> <p>10.4 People have the skills, confidence and capacity to make positive changes in their lives and their communities</p>
<p>Goals under this Priority Include:</p> <ul style="list-style-type: none"> • There are high quality facilities across the ward for recreation and learning • Improve the availability of community information

DRAFT ACTION PLAN

PRIORITY 8 – Ensuring all Residents of Fa’side feel Safe and Secure in their Community

The difference we want to make	Why is this important in this area:
<p>Police Scotland’s Multi-Member Ward Plans outline the priorities the community identified during their consultation. These priorities have been adopted by the Fa’side Area Partnership and integrated into our draft Area Plan as they are issues that we all need to help address if we want to make the Fa’side area a safe place to live, work and travel in.</p> <p>To ensure everyone in Fa’side feels safe and secure in their community we need to:</p> <ul style="list-style-type: none"> - Improve road safety measures in and between our settlements for pedestrians and cyclists and other road users. - reduce antisocial behaviour in our areas - Make required improvements to ensure all residents feel comfortable using our parks, green-spaces and other public places. - Enhance the opportunities for the community to influence local policing priorities. - Ensure that people feel safe at all times inside their own homes. - Tackle substance misuse and dealing in our communities 	<p>Although crime and anti-social behaviour were not prioritised as key issues for the Area Partnership there are some key concerns in this area to be addressed.</p> <p>Pedestrian and cyclist safety in Tranent town centre and on the roads between the villages has been raised as an issue by several groups and in 2012 Fa’side had significantly more Road Traffic Collisions than any other ward in East Lothian.</p> <p>Young people in Fa’side are significantly more likely to feel unsafe due to: “Drug Users”; “Drunks in the Street”; “Walking through Dark Areas” and “Group of Young People I Don’t Know” than the average across East Lothian.</p> <p>In addition Fa’side residents are significantly more likely to say that they feel “Fairly Unsafe” while walking alone after dark in their neighbourhood than the East Lothian average.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 7: East Lothian is an even safer place</p>
<p>Goals under this Priority Include:</p> <ul style="list-style-type: none"> • Local Communities, Police and other Public Agencies work effectively together to ensure Fa’side is safe and feels safe • Anti-Social Behaviour throughout the ward is tackled and its impact on the community is reduced • The impact of drug use in our community is minimized and those responsible dealt with accordingly • People feel safe in their own homes and crimes against property are reduced

PRIORITY 9 – Becoming a more supportive and inclusive community

The difference we want to make	Why is this important in this area:
<p>We want the Fa’side community to be one which is welcoming, inclusive and supports and protects those who are vulnerable, including:</p> <ul style="list-style-type: none"> - Those who are socially excluded, such as some elderly residents or incomers to the area. - Young people, including those at risk. - Those who suffer from drug and alcohol addiction or the addiction of others. - Those suffering from or at risk of dementia, learning difficulties or mental health issues. 	<p>Concerns have been raised regarding the need for support for some groups within the community.</p> <ul style="list-style-type: none"> • In Fa’side a greater number of residents are under 25 than average across Scotland and there are worries that there are not enough facilities targeted to young people. • There are also a greater number of carers who are young people than the average • some areas of Tranent have among the highest rates of ASB in the county and this can have an impact on resident’s mental health and well-being. • There is a large population in the new housing to the south of the Tranent who may not currently be fully involved with the community • The percentage of the population over the age of 65 is predicted to grow rapidly over the next 15 years and there are concerns that there is a lack of activities and facilities tailored to this age group. • there are concerns that particularly older single men are difficult to engage and may be missing out. <p>Support processes need to be developed to ensure everyone in the community has access to the help they need, and that the wider community is understanding and supportive for those needing help.</p>
<p>Related outcome in the East Lothian Plan</p>	<p>Outcome 10: East Lothian has stronger, more resilient, supportive, influential and inclusive communities</p>
<p>Goals under this Priority Include:</p> <ul style="list-style-type: none"> • Creating a community which supports and enables those living with dementia and other mental health disorders to live happy and independent lives • Support older people to access opportunities in their communities for as long as possible • Ensuring all young people in the area have the opportunity to fulfil their potential • That people moving into the area are encouraged to integrate with the local community
