

affordable housing

consultative draft supplementary
planning guidance

How to Respond to this Consultation

Comments are sought on this Consultative Draft Supplementary Planning Guidance on Affordable Housing, which was approved for consultation at East Lothian Council's Committee 26th June date.

The purpose of this Consultative Draft Supplementary Planning Guidance on Affordable Housing is to provide an opportunity for feedback, prior to publication of the final document. Comments and views on the draft Guidance are invited, to promote and enable improved delivery of affordable housing across the county. In particular, does the draft Guidance:

- Clearly set out information and advice to individuals and organisations with an interest in affordable housing?
- Provide clarity in relation to the affordable housing requirement and contributions to be sought?
- Promote transparency and consistency with regard to the developers affordable housing obligations.

A Consultation Questionnaire is attached at Appendix 6 to help you respond and this is also available online at xxx although you do not have to use this questionnaire to respond if you do not wish to do so.

Comments are invited **IN WRITING by 5pm on 17th August 2018.**

By post to: **Wendy McGuire, Team Manager, Strategic Investment and Regeneration, East Lothian Council, John Muir House, Haddington, East Lothian, EH7 4LB**

Appendix 4: Commuted Sums levels, April 2017-March 2019

Appendix 5: Contact List

Appendix 6: Consultation Questionnaire

1. Purpose of Document

This draft Supplementary Planning Guidance (SPG) on Affordable Housing supplements *Policy HOU3: Affordable Housing Quota* and *Policy HOU4: Affordable Housing Tenure Mix* of the Proposed LDP in relation to the delivery of affordable housing. It sets out how the planning system can assist with facilitating the delivery of affordable housing.

This draft SPG is non-statutory and is intended to provide further information and detail on how the above policies of the East Lothian Proposed LDP should be interpreted and applied. As such it provides a framework for the implementation of East Lothian Council's Affordable Housing Policy (as it relates to LDP policy i.e. quota, tenure mix, specialist provision etc.) and outlines the mechanisms by which affordable housing can be delivered within a broader economic context. It aims to set out detailed guidance alongside the Strategic Development Plan (SDP) and LDP policies on affordable housing.

This draft SPG on Affordable Housing has been prepared to:

- Set out information and advice to individuals and organisations with an interest in affordable housing
- Provide clarity in relation to the affordable housing requirement and contributions to be sought
- Promote transparency and consistency with regard to the developer's affordable housing obligations.

2. National and Local Strategic and Policy Context

This draft SPG on Affordable Housing has been informed by the national and local strategic and policy context outlined as follows:

2.1 National Strategic and Policy Context

Homes Fit for the 21st Century (2011) – This policy paper sets out the Scottish Government’s Strategy and action plan for housing for the period 2011-20. It identifies a need to build new high quality affordable homes (including social housing) to meet need and demand from a growing and ageing population, including households on lower incomes.

2.1.1 Scottish Planning Policy (2014) - The only definition of affordable housing comes from Scottish Planning Policy (SPP), which defines affordable housing as:

“Housing of reasonable quality that is affordable to people on modest incomes. In some places the market may be able to meet most affordable housing needs but this will not be the case everywhere. Affordable housing may be provided in the form of social rented accommodation; mid-market rented accommodation; shared ownership housing; shared equity housing; housing sold at a discount (including plots for self-build) and low-cost housing without subsidy” (SPP 2014).

The term ‘affordable housing’ can be controversial and an emotive subject for many, as what may be affordable to some people, may not be for others. SPP states that where the Housing Need and Demand Assessment (HNDA) and Local Housing Strategy (LHS) identify a shortage of affordable housing, it should be addressed in the LDP as part of the housing land allocation. The HNDA provides the evidence base for defining housing supply targets in LHSs and allocating land for housing in LDPs.

SPP 2014 includes a wide range of Planning Advice Notes (PANs) including PAN 2/2010: Affordable Housing and Housing Land Audits (August 2010)¹. This sets out information regarding technical planning matters and provides a statement of advice on developing planning policy in relation to affordable housing and housing land audits. It describes a range of tenure types that can contribute to affordable housing and alternative means of delivering affordable housing (considered in Section four of this SPG). The nature of the contribution is typically the provision of serviced land e.g. a proportion of the site which can be developed by or for the local authority or other affordable housing provider. PAN 2/2010 does stress that its advice must be applied constructively and with flexibility in response to financial and market conditions.

¹ PAN2/2010 revoked PAN74 Affordable Housing (March 2005).

2.1.2 Local Housing Strategy Guidance (2014) - The Local Housing Strategy (LHS) is a local authority's sole strategic document for housing in its area, covering a five-year period. It sets out the strategy, priorities and plans for the delivery of housing across all tenures, to meet identified need. Refreshed LHS Guidance (2014) supports local authorities in the preparation of their LHS. In accordance with Guidance, the LHS must consider the scale and distribution of the affordable housing requirement for a specified area. Where a shortage of affordable housing is identified, the LHS should clearly set out the role that affordable housing policies are anticipated to play in addressing this.

2.1.3 Housing Need and Demand Assessment (HNDA) Guidance (2014) - The Housing (Scotland) Act 2001 states that the LHS must be supported by an assessment of housing need and demand, with the HNDA forming a key part of the evidence base for the LHS and setting Housing Supply Targets. The HNDA also informs Development Plans, with local authorities (as both the statutory housing and planning authority) responsible for assessing housing requirements, ensuring a generous supply of housing land and enabling the delivery of both market and affordable housing.

Refreshed HNDA Guidance provides a step-by-step approach to assessing need and demand across all tenures. Local authorities are encouraged to undertake this assessment at housing market area level and provide a clear understanding of the operation of the housing system as a whole. The HNDA should provide evidence to inform policies in relation to the level of affordable housing required.

2.1.4 Joint Housing Delivery Plan for Scotland (2015) - Halfway through the decade it was considered appropriate to reaffirm Scotland's shared public and private commitment to the vision set out in Homes Fit for the 21st Century. A Housing Policy Advisory Group was established and a Joint Housing Delivery Plan for Scotland published to ensure delivery of the strategic objectives set out in Homes Fit for the 21st Century and other Scottish Government Strategies with a bearing on housing.

2.1.5 More Homes Scotland (2016) – Following publication of the Joint Delivery Plan, the Scottish Government set a target of building 50,000 affordable homes by 2020 (35,000 of which are to be social rent) in a £3 billion investment programme, to increase the supply of affordable housing nationally by 67%. It is anticipated this housing investment will help to sustain 20,000 jobs, bring over £10 billion into the economy and be key to tackling poverty.

The More Homes Scotland approach is focussed on investing more public and private money in housing, getting land ready for housing and making sure we plan for new housing effectively. The approach includes although is not limited to:

- Increasing subsidy levels for affordable housing
- Establishing a Rural Housing Fund
- Providing support for City Deals
- Inviting proposals for the expansion of mid-market rent housing
- Market testing a private rented sector rental income guarantee scheme
- Investing £160 million to support affordable home ownership

2.2 Local Strategic and Policy Context

East Lothian Local Housing Strategy (2012-17 and 2018-23) - In accordance with LHS Guidance, the East Lothian LHS 2012-17 provides the strategic direction to tackle housing need and demand and inform future investment in housing across the county. The LHS sets out five strategic outcomes including *'Outcome 1: Increase housing supply and improve access to appropriate housing including affordable housing'*. The implementation of SPG on Affordable Housing contributes towards meeting this outcome.

A draft East Lothian LHS has been prepared to cover the period 2018-23 and it is anticipated this will be published in Summer 2018. It contains six priority outcomes including *'Priority Outcome 2: The supply of housing is increased and access to housing improved across all tenures'*. Once approved and published, the revised LHS will link as appropriate to this SPG.

2.2.1 East Lothian Strategic Plan for Health and Social Care Integration (2016) - The LDP, LHS and East Lothian Strategic Plan support the principle of specialist housing provision and provision for specific housing needs. There is also a commitment across strategies and plans to achieving National Health and Wellbeing Outcomes, in particular Outcome 2 *'People, including those with disabilities or long term conditions, or who are frail, are able to live, as far as reasonably practicable, independently and at home or in a homely setting in their community'*.

2.2.2 East Lothian Strategic Housing Investment Plan 2018/19–2022/23 - East Lothian Council is required to prepare a Strategic Housing Investment Plan (SHIP) annually, to cover a five-year period. The most recent SHIP sets out East Lothian's strategic housing investment priorities for the period 2018/19- 2022/23. It contributes towards achieving the outcomes set out in the LHS and demonstrates how investment in affordable housing will be targeted to meet these objectives. It is also the key document for identifying the strategic housing projects which will assist the successful delivery of the Scottish Government's target of 50,000 affordable homes by 2020/21.

3 The Need for Affordable Housing

This Section of draft SPG sets out the identified need for affordable housing and corresponding key issues.

3.1 Assessing the Need for Affordable Housing

Planning Circular 1/2013² sets out Scottish Ministers' determination of the boundaries of the four Strategic Development Plan (SDP) areas across Scotland:

- 4 Glasgow and Clyde Valley (Clydeplan);
- 5 Aberdeen City and Shire;
- 6 Dundee, Perth, Angus and North Fife (TAYplan) and
- 7 Edinburgh and South East Scotland (SESplan).

East Lothian is situated within the Edinburgh and South East Scotland Strategic Development Plan (SESplan) area, comprising of the City of Edinburgh; East Lothian; Fife³; Midlothian; Scottish Borders and West Lothian Council administrative areas. Given this, Housing Need and Demand Assessments (HNDAs) prepared for the SESplan area, cover the administrative area of East Lothian. Three housing market areas are identified across the county, with the HNDA carried out at an East Lothian wide and housing market area level. The three housing market areas comprise Musselburgh, Haddington, Tranent etc; East Lothian Coastal Settlements and Dunbar and its Hinterland.

SESplan HNDA was signed off as robust and credible by the Scottish Government in June 2011. It provides an estimate of total housing need by calculating current housing need and estimating future housing demand. Estimated supply from stock turnover is then deducted to provide net housing need. Table 3.1 shows an estimated 232 households are projected to require affordable housing in East Lothian per annum, net of existing turnover.

Table 3.1: SESplan HNDA: East Lothian Total Household Need for Affordable Housing (Net of Turnover) – Average Applying Over Next 10 Years (per annum)			
	East Lothian	Lothian	SESplan
Housing Need			
Existing Need	138	1,306	1,908
Future Need	408	4,074	6,116
Total Housing Need	547	5,380	8,025
Housing Supply			
Supply from Turnover	314	3,009	5,265
Net Housing Need			
Housing Need – Net of Turnover	232	2,383	2,807

Source: SESplan HNDA Final Report, 2011

² Planning Circular 1/2013 represents a change to the previous TAYplan boundary and revokes Planning Circular 3/2008

³ Fife comprises of the southern half of Fife for SESplan purposes, with the northern half falling into the TAYplan area.

SESplan HNDA also provides an estimate of demand for market housing, with demand for new houses net of turnover for East Lothian at 11,770 from 2009-32 as shown in Table 3.2. Table 3.2 sets out the % split in relation to need and demand for market and affordable housing. In the short term up to 2019, it demonstrates that affordable housing need is more acute, with a 41% requirement.

Table 3.2: SESplan HNDA – East Lothian Demand for New Houses Net of Turnover, 2009-32 (per annum) and % Affordable Housing Requirement											
	Yrs 1-5 (2009-14)		Yrs 6-10 (2015-19)		Yrs 11-15 (2020-24)		Total Housing Demand 2009-24	Yrs 16-20 (2025-29)		Total Housing Demand 2009-32	
	No.	%	No.	%	No.	%	No.	No.	%	No.	%
Affordable	197	41	232	41	143	26	2,860	122	25	3,844	33
Market	282	59	331	59	405	74	5,090	360	75	7,926	67
TOTAL	479		563		548		7,950	482		11,770	

Source: SESplan Housing Technical Note, 2011

SPP suggests the quota of affordable homes that can be expected from a market housing site should normally be no more than 25% of units. In East Lothian, the primary requirement in relation to affordable housing is for social rented housing, however it is recognised that other affordable housing models are required to meet need and demand.

The Proposed LDP requires to ensure sufficient housing land is available to deliver 6,250 homes in the period 2009-19 and a further 3,800 homes over the period 2019-24. In total, sufficient housing land is needed in order to deliver 10,050 homes in the period 2009-24.

The most recent HNDA (SESplan HNDA2) shows a need for even more housing per annum (including affordable housing) until the year 2030. Housing development in East Lothian is therefore likely to continue to grow at a fast pace, aiming to make an appropriate contribution to the Scottish Government target of 50,000 new affordable homes by the end of this parliament. It is therefore critical that East Lothian Council maximises its opportunities to increase the supply of affordable housing through the LDP.

3.2 Key Issues Identified in SESplan HNDA

SESplan HNDA identifies a range of issues in relation to the need and demand for housing across the county, informing an evidence base for the LHS 2012-17. These issues are summarised as follows:

- Circa 4,000 households on the Council’s housing list
- Identified need for 10,050 houses in East Lothian between 2009 and 2024
- Requirement for 6,250 units of housing between 2009 and 2019
- Further requirement for 3,800 units of housing to be delivered between 2019-2024
- Lack of availability of land to deliver affordable housing is a major problem
- 33% affordable housing needed within the overall housing supply figure
- High demand for all types and sizes of housing in East Lothian

- A combination of a growing population; households becoming smaller and an ageing population is likely to mean that more affordable housing is required, particularly smaller units
- An ageing population is likely to mean more affordable housing is needed for older people and people with a physical disability
- Changes to homelessness legislation will put increased pressure on affordable housing and mean more new build affordable housing is needed
- High house prices and challenges around borrowing from lenders create difficulties in relation to purchasing on the open market, particularly for first time buyers
- An increased range of tenures are available that should be supported
- The economic climate has caused the house building industry to slow down, affecting the amount of affordable housing which can be built
- The private rented sector can be difficult for people to access and afford
- Welfare Reform is causing difficulty for some household groups with regard to the affordability of housing costs and for landlords to be able to invest in new housing
- Existing housing stock is highly pressured and must be used effectively

3.3 Assessing Local Need for Affordable Housing

While SESplan HNDA provides information at a county wide and housing market area level, more detailed intelligence is required at a local level to ensure local needs are met and to promote sustainable and balanced communities. East Lothian Council's Strategic Investment Team will prepare a Local Investment Framework by June 2019 to improve this intelligence and create a tenure mix for specific areas. Until this is in place, the Strategic Investment Team will assess each site on its own merits.

3.3.1 Assessing the Need for Specialist Provision

Demographic trends indicate that the population of older people is increasing and will continue to increase in the future, as older people are living longer. The number of people of pensionable age is projected to increase in all council areas across Scotland, with the second largest increase projected in East Lothian at 42% from 2014-39⁴.

By 2039, seven local authority areas across Scotland are projected to have half of their households headed by someone aged 60+. In East Lothian, 44% of households are projected to be headed by a person aged 60+ by 2039. Table 3.3 sets out household projections for older households headed by a person aged 75 and over in East Lothian.

Table 3.3: Household Projections for Households Headed by a Person Aged 75+ in East Lothian, 2014-39					
	2014	2039	Average Annual Change	Overall Change 2014-39	
				No.	%
East Lothian	6,286	12,169	235	5,883	94
Scotland	311,183	556,107	9,797	244,924	79

Source: NRS 2014-based Household Projections

⁴ NRS 2014-based population projections

A significant proportion of older people will live alone or in smaller households, increasing the need for smaller sized homes. There are currently more single adult households aged 65+ than two person households and the projected growth in single person households is substantial. However, with projected increases of 29.0% for older single person households and 39.6% for older two-person households from 2012 to 2026, this gap is likely to begin to close across the county. This will mean there are likely to be increasing levels and substantive numbers of couple households wishing to remain together for longer in mainstream housing. In turn, this may impact upon care and support requirements.

A high proportion of older people are likely to have dementia and / or complex needs, despite increasing healthy life expectancy, which will have major implications for housing support and specialist housing provision. The projected changes to the population and household trends point to a shift towards a higher level of dependence within our population.

The majority of older people in East Lothian currently live in private mainstream housing (67%). However a potentially substantial proportion of older people are unlikely to have sufficient equity available in their existing homes, to have the capacity to fulfil their housing and care needs in the private market.

In addition to an ageing population, the need for specialist provision is and will continue to become increasingly important for people with a physical disability; people with a learning disability and people with a complex mental health condition. This is attributable to a growing population generally; an increase in complex needs and dementia; the policy objective of the Scottish Government to continue to shift the balance of care away from institutional settings and increasing public expectations of service provision.

The HNDA focusses on the need and demand for affordable and market housing, with the most recent HNDA (SESplan HNDA2) breaking this down into need and demand for privately owned housing; private rented housing; intermediate tenures i.e. mid-market rent, low cost home ownership and social housing. However, East Lothian Council considers the evidence in relation to housing need for specialist provision for particular needs groups to be limited in comparison. To enhance HNDAs, a Housing Need and Demand Assessment for Specialist Provision for Particular Needs Groups in East Lothian has been prepared. This analyses the scale, nature and location of need and demand for particular needs groups across the county. This shared evidence base is critical to informing strategic planning for the delivery of future specialist housing provision and supports the wider integration of Housing and Health and Social Care.

It is clear that addressing the housing needs of increasing numbers of older people and other vulnerable groups will require a major rethink and redesign of services and building new, affordable and sustainable housing is a key priority. A variety of house types and sizes will be required, to promote mobility in the housing system and enable downsizing where appropriate. This may result in some lower densities on some affordable housing sites. Accessible and adaptable smaller sized homes and developing appropriate specialist housing will be critical.

All developments which propose to develop housing defined under use class 9 (whether a conversion, amenity, sheltered or retirement) will fall under the affordable housing policy and the 25% affordable housing quota.

3.4 Town Centre Provision

Town centres are an important part of the settlement strategy, providing a focus for a wide mix of land uses including housing. East Lothian Council has signed up to the '*Town Centre First Principle*'⁵, which supports continued investment in town centres, to help communities to thrive. The East Lothian LHS considers the opportunities that exist for supporting town centre living and the scope that town centres may provide to contribute to meeting local housing need and demand. East Lothian Council's Strategic Housing Investment Team will consider funding initiatives to help resource affordable housing and complement wider regeneration activity. Housing / tenure mix is key to the success of sustainable and vibrant town centres, with affordable units dispersed evenly throughout.

3.5 Rural Housing Provision

Rural parts of the county although very different in character, have a distinct set of issues in common in relation to housing. Demand for housing is high across all tenures in East Lothian, but there is particularly acute pressure in rural areas, due to a shortage of affordable housing. In part this is due to a loss of properties through the Right to Buy, which impacted significantly upon rural areas. Demand for housing in rural areas keeps house prices high, with evidence suggesting that house prices in rural areas are higher than in the main settlements. There is also national evidence that households living in rural areas typically need to spend 10-20% more on everyday requirements than those in urban areas.

New build housing development in the countryside will be supported in the LDP in circumstances where there is no existing house or no appropriate existing building suitable for conversion, identified as being available in the locality.

In the case of small scale housing proposals in the countryside, the LDP will support new affordable housing if evidence can be provided and the affordable housing provider can ensure that the dwellings will remain affordable in the longer term.

⁵ <http://www.gov.scot/Topics/Built-Environment/regeneration/town-centres/TheTownCentreFirstPrinciple>

4 Affordable Housing Contribution

In accordance with SPP, this Section of draft SPG sets out East Lothian Council's approach to how the affordable housing contribution is agreed and secured.

Based on evidence from SESplan HNDA and the LHS 2012-17, a specific policy intervention in the planning process in the form of an affordable housing policy is identified as being required, to help increase the supply of affordable housing across the county.

SESplan HNDA evidences a 33% requirement for affordable housing during the period 2009-32, with a more acute requirement of 41% during the earlier period up to 2019. However, SPP suggests the quota of affordable homes that can be expected from a market housing site should normally be no more than 25% of units.

4.1 Site Thresholds

Policy HOU3: Affordable housing quota

Development proposals (including conversions) that in their totality will bring forward five or more dwellings must make provision for affordable housing as part of the proposal. The required proportion of affordable housing to be provided will be 25% of the total number of dwellings proposed for the site.

This includes all housing developments which propose to develop housing defined under use class 9 (whether a conversion, student accommodation, amenity, sheltered or retirement) will fall under the affordable housing policy, with a 25% affordable housing quota applicable. East Lothian Council will seek to secure this 25% affordable housing contribution in the same manner as any other affordable housing where this can be justified by the HNDA, whilst consistent with and complimenting the LHS and Proposed LDP. Where the 25% is not a whole number, it will be rounded up or down accordingly.

To allow for the transition between Plans, affordable housing quotas for previously allocated sites will remain as set by the previous Local Plan. The affordable housing quota of the previous Plan was 25%, other than at Blindwells and at Letham Mains, Haddington where 30% and 17% quotas were set respectively. Both exceptions will remain in this Proposed LDP. Other than these exceptions, the provision of serviced land should be transferred to deliver an affordable housing contribution amounting to 25% of the total number of units proposed.

The process of securing and delivering affordable housing requires negotiation between the Council and developer. These negotiations at the time of pre-application or application discussions will determine the actual requirement and the form of the provision.

4.2 Pre-application discussions

The Council encourages applicants to engage in pre-application discussions around the key policy requirements as early as possible. In all circumstances, the approach to delivering affordable housing must be agreed with the Council's Strategic Investment & Regeneration Team.

This will include agreement around the location and area of land or proposed housing units within the development to be transferred. The affordable housing provider must also be agreed with the Council to ensure acceptability and support for subsidy from the Scottish Government. Agreement must be reached on all aspects (housing mix, house types, tenure, density, provider and delivery mechanism) to ensure that the affordable housing is proposed to be provided in an appropriate layout and form of development which will allow needs to be met.

An overall phasing strategy must be agreed as part of the planning application to ensure the affordable housing can be delivered in tandem with the private units. It will be critical to ensure the affordable housing is programmed into budgets and bids for subsidy to ensure delivery timescales.

If the approach and delivery of the affordable units is not agreed with the Council, this will result in a recommendation to refuse planning.

4.3 Affordable Housing Mix

East Lothian Council will seek to promote sustainable and mixed communities, developing a range of affordable housing to match local needs. East Lothian Council's Strategic Investment Team is currently preparing a Local Investment Framework, to build on existing intelligence. In the future this will indicate the requirement for the delivery of specific tenures and client groups within each of the sub-housing market areas. Until such time, each site will be assessed individually to ensure local needs are met.

It is important that particular demographic / geographical requirements are considered within the context of available subsidy. This can only be achieved through close working with developers, RSLs and other partners as agreed by the Council. Developers must therefore engage with East Lothian Council's Strategic Investment & Regeneration Team, prior to the submission of a planning application, to discuss and agree the affordable housing requirement pertaining to individual sites. This will include the area of land; number of units/ density; tenure; house types; design and where practicable, the method of delivery.

The overarching priority of East Lothian Council is to secure onsite delivery of affordable housing units preferably for social rent, through the transfer of serviced land or completed units. However, it is acknowledged that there is also a need to increase choice for those in need of affordable housing and deliver other affordable tenures.

In the event that East Lothian Council accepts that onsite delivery for social rent is not the priority or is undeliverable, consideration will be given to the delivery of alternative tenures i.e. mid-market rent or low cost home ownership, which are outlined in Section Six of this draft SPG.

4.4 Delivery Partners

In addition to delivering its own programme, East Lothian Council works with a number of Registered Social Landlords. Agreement on the housing provider must be sought with the Council's Strategic Investment and Regeneration Team to ensure support from the

Scottish Government in its allocation of subsidy.

4.5 Securing the Affordable Housing Contribution

Town and Country Planning (Scotland) Act 1997 (Section 75)

The delivery of the Affordable Housing contribution will be secured through the Town and Country Planning (Scotland) Act 1997 (Section 75). This allows a planning authority to enter into an agreement with any person interested with land in their District (in so far as the interest of that person enables him to bind the land) for the purpose of restricting or regulating the development or use of the land, either permanently or during such period as may be prescribed by the agreement.

For a development scheme requiring the provision of an affordable housing contribution, a planning obligation contained within a Section 75 agreement will require to be entered into to secure the affordable housing requirement.

The cascade approach referred to above will be secured within the Section 75 agreement in accordance with the order of preference as follows:

1. On site by the transfer of serviced land or the delivery of completed units;
2. Off site by the transfer of serviced land or the delivery of completed units over and above any existing requirement;
3. Commuted sum

The Section 75 agreement will set out timeframes to agree the method and timing of delivering the affordable housing i.e.

- 5 To agree the delivery package prior to the commencement of development
- 6 The timing of when the serviced land or completed units will be transferred to the Affordable Housing provider (usually by completion of an agreed number of market units).

The Section 75 agreement will require to be concluded prior to the issuing of any associated planning consent.

The onus is on the applicant to demonstrate how the affordable housing contributions will be met within its proposal. This **MUST** be agreed in advance with East Lothian Council's Strategic Investment & Regeneration Team to avoid any objections which could result in delays and abortive fees.

The delivery of housing is a key priority both nationally and local and this approach seeks to increase delivery across East Lothian

4.6 Cascade

First Preference - On site provision by transferring serviced land or completed units

(a) transfer of serviced land:

The affordable housing requirement must be provided in full on site, delivered by way of transferring fully serviced land to an affordable housing provider agreed by the Council's Strategic Investment & Regeneration team. An affordable housing provider is usually the Council or a Registered Social Landlord (RSL) currently operating in East Lothian.

However, there may be other circumstances where the Strategic Investment & Regeneration Team have agreed to the delivery of an unsubsidised model of affordable housing and another provider of affordable housing may be accepted in these circumstances.

Serviced land is defined as 'land that is certified as ready for development and which benefits from the availability of utility service connections to the boundary, including surface water drainage; water mains; electricity; gas; telecoms including digital connectivity; mains sewer with an access point and route of vehicular and pedestrian access. Special care must be taken to ensure that the different elements of the development are successfully integrated and that the areas earmarked for the affordable housing element are not subject to any disproportionate or unreasonable development constraints.

Where serviced land is being transferred to East Lothian Council or a Registered Social Landlord, it will be valued at an appropriate end-use value determined by the District Valuer, in accordance with the current Royal Institution of Chartered Surveyors (RICS) Valuation Professional Standards, or at a value agreed by all parties involved in line with RICS standards. Where the land is being transferred to the Council, the valuation report will be instructed jointly with the expense being shared between the council and the developer.

Developers should take the requirement for affordable housing and any other Section 75 contribution into account in their own land and property negotiations with landowners to ensure the reduced land value is reflected in the purchase price. Developers should note that such value will be minimal. PAN 2/2010 states '*where non-market housing is to be provided as part of the development or part of the site is to be purchased by the Council or a Registered Social Landlord at a value lower than market housing, this will affect the price which can be paid for the land and will require to be negotiated with the site owner.*'

(b) Transfer of Completed Units

The affordable housing provider may wish to explore the delivery of completed units as an integral part of a mixed residential development with the landowner, rather than the transfer of serviced land. This can often provide a positive outcome in terms of a mixed residential development resulting in a tenure blind development. East Lothian Council's Strategic Investment & Regeneration Team will be happy to explore options with developers who wish to build and transfer affordable homes. Timing, specification and design (as set out in chapter 5), costs and values would need to satisfy best value in these circumstances.

Please note however that the same principles will apply i.e. The Strategic Investment & Regeneration Team must agree the location and area of land to deliver the required affordable housing mix. The team is also responsible for agreeing the Affordable housing provider and tenure delivery on site (set out in section 5).

The unit value will be determined by the affordable housing land value as outlined above, plus the developer's construction costs. If the unit cost does not present value for money for either the developer or the affordable housing provider, then the developer will be required to transfer the serviced land to allow the provider to deliver the units through their own construction frameworks.

Second Preference - Off-site Provision

The provision of an off-site contribution is only deemed appropriate in circumstances where it is not practicable to deliver on-site, for example:

- Site-specific constraints,
- High development costs,
- The alternative site may be in a better location and deliver a better outcome for the affordable housing,
- The timeframe for the development of an off-site alternative could benefit East Lothian Council or a Registered Social Landlord.

Any off-site contribution must be agreed with East Lothian Council's Strategic Investment & Regeneration Team in the first instance, have planning consent and be in the form of fully serviced land and / or completed units, as outlined in accordance with preferences one and two.

The site area and number of affordable units provided off-site must equate to that which would have been provided on-site. If off-site provision is deemed acceptable, the units must be over and above any affordable units already required by this site.

Third Preference - Commuted Sums

A commuted sum will only be considered as a last resort, where neither on-site nor off-site provision is deemed to be practicable by East Lothian Council's Strategic Investment & Regeneration Team.

Commuted sums will be paid to East Lothian Council and reinvested in the provision of affordable housing in East Lothian. The funds will be used to acquire sites, fund build costs and / or acquire units within the same market area.

A commuted sum is calculated as 'the value equivalent to the cost of providing the proportion of serviced land required by East Lothian Council's Affordable Housing Policy'.

The valuations will be updated every two years or earlier if there has been a material change in the market.

The financial contribution for each East Lothian market area has been assessed in accordance with the District Valuer's methodology and are set out in Appendix Four.

Please note that these sums only apply to the 6 main towns i.e Musselburgh, Prestonpans, Tranent, Haddington, Dunbar and North Berwick. Any development out with these main towns e.g. Longniddry, Aberlady, Direlton and sites within the countryside etc. will be valued independently.

4.7 Subdivision of sites

Where East Lothian Council considers that developers have submitted multiple planning applications for housing on the same or adjacent sites in order to reduce the provision of affordable housing required in terms of the Affordable Housing Policy, such applications will be processed as a single application.

4.8 Rural Housing Sites

Where an opportunity is identified for development in a rural area which has no new build provision and is not well served by public transport and local amenities, it can often be unsuitable for social rented housing. East Lothian Council's Strategic Investment & Regeneration Team will consider alternative affordable housing tenures on such developments, providing the developer ensures that the dwellings will remain affordable in the longer term.

The Proposed Local Development Plan is supportive of new build housing development in the countryside, where there are no existing buildings suitable for conversion. In the case of small scale housing proposals, the Proposed Local Development Plan will support affordable housing if need is evidenced and the affordable housing provider ensures that dwellings will remain affordable in the longer term.

4.9 Viability Assessments

East Lothian Council accepts that anticipated provision of affordable housing can affect land values for residential development. However, developers are expected to take account of planning policies and this SPG, including its effect on land values, prior to entering into land and property negotiations.

It is acknowledged there are often other contributions and unknown costs at the time of purchase, which together could make the development unviable. Where a scheme is considered to be unviable, developers will be required to demonstrate this by submitting a financial viability assessment on an 'open book' basis. In some cases, East Lothian Council's Strategic Investment & Regeneration Team may instruct an independent appraisal and only in exceptional circumstances will exemption be given.

The following costs are not typically considered to be abnormal:

- Site purchase / acquisition
- Site clearance works including levelling
- Removal of known contamination / remediation
- Provision of access
- Drainage
- Grouting

5 Delivery / Development Requirements

5.1 This section of the draft SPG sets out the specification and design requirements for the affordable housing.

PAN2/2010 advises that affordable housing ought to be, as far as possible, indistinguishable from the general mix of other houses on a site in terms of style and layout, use of materials, architectural quality and detail. Both 'pepper potting' of individual affordable houses throughout a development and large groupings of houses of the same tenure are best avoided. Concentrating affordable housing for rent in small groups will ease the subsequent management of the homes by the Council or an RSL and contribute towards providing mixed communities.

The provision of affordable housing is about more than just bricks and mortar. It is about supporting place-making to ensure new housebuilding fosters good community relations and promotes positive health impacts. It is about creating vibrant, balanced communities which incentivise diversification in housing. It is also about the quality of what is provided, irrespective of tenure or type. Good design can contribute to health and wellbeing and improved quality of life and new housing should be innovative in terms of design, layout, open space provision, construction and energy efficiency. National planning policy set out in *Designing Places*, *Designing Streets* and the SPP, aims to achieve high quality, well-designed homes in all new housing developments, including affordable housing and attention should be on both individual homes and the layout and design of the wider community.

The demographics of East Lothian are changing and with a growing ageing population there is a corresponding increase in demand for affordable housing suitable for older people and the specific design or management requirements this necessitates. To enable the delivery of quality housing and related services for a growing number of households across the county it is important to explore opportunities for future proofing housing designs.

5.2 Assessment of Sites

As set out in the previous chapter, the approach to delivering affordable housing must be agreed with East Lothian Council's Strategic Investment & Regeneration Team on all matters related to delivery, including the location, number, type, tenure, density and design of affordable housing as well as the affordable housing provider and delivery method. The areas for affordable housing must be identified on the masterplan for the development and be capable of accommodating the required type, mix and number of affordable units to be built on them.

The availability of funds to support the delivery of affordable housing will be set out in the Council's Strategic Housing and Investment Plan. The Scottish Government confirm the Council's definite resource allocation on an annual basis with minimum resource allocations publicised for future years to assist with longer term programming.

The delivery of the affordable units is complex and East Lothian Council recognises that the availability of public subsidy is important in determining which form of affordable tenure may be provided i.e. subsidy is critical in helping to deliver social housing therefore The rate of phasing and timing for affordable housing is therefore critical to allow for programming of funding and resource planning. Understanding the timing and phasing of delivery can often make it difficult to confirm the tenure as developments may not feature within the current programme and budget.

Developers should note that where subsidy is not available, East Lothian Council's requirement to deliver affordable housing remains.

5.3 Quality and Design

East Lothian Council require all affordable homes to be of a good design and quality and fit for purpose. Affordable housing should be innovative in terms of design, layout, open space provision, construction and energy efficiency. The following are key considerations in the design of affordable housing on any scheme.

5.3.1 Integration

When designing affordable housing, it is important to ensure integration to blend the affordable housing aspects within the overall development rather than isolating these areas to ensure the development is tenure neutral. The aim must be to prepare a design that delivers a mixed community with a sense of place and identity.

Smaller groups of affordable housing should be distributed throughout a large site, as opposed to being concentrated in one area. Each affordable plot should be clearly separate from one another and located such that they can be developed consistent with any proposed phasing plan. The creation of large single tenure areas will be unacceptable. Higher densities for the affordable housing in comparison to the market housing should also not be assumed to be acceptable.

5.3.2 Layout:

- Must be located where possible, close to public transport, paths and active travel links and community facilities and amenities
- Located to maximise solar gain
- Should contribute to opportunities for open space and green network enhancement wherever possible
- Must be of an area sufficient to accommodate the required number of units at a suitable density to provide an appropriate housing mix to meet the assessed local housing need.

5.3.3 Housing Types

Achieving the correct type and size of housing, including special needs is key and an appropriate mix of the following house types will be expected:

1bed/2apt/2person flats

2bed/3apt/3person and 4person flats

Cottage style flats with main door access are preferable to flats with common stairs.

2bed/3apt and 4apt/4person houses

3bed/4apt and 5apt / 5 person houses

4bed/5apt and 6apt / 6 person houses

2bed/3apt/3 and 4person wheelchair bungalow or ground floor flat

3bed / 4apt / 4 and 5 person wheelchair bungalows

5.3.4 Specification

All matters of design should be discussed and agreed with the affordable housing provider for whom the properties are being delivered.

Room sizes and layouts must meet the requirements of the affordable housing provider to ensure they reflect individual allocation policies e.g. minimum space standards for bedroom sizes, build in storage requirements.

As a minimum, affordable homes must comply both internally and externally with the relevant Essential design criteria from Housing for Varying Needs (HfVN) to ensure they address the requirements of the Scottish Government and Local Authority.

Developments should aim to achieve Secure by Design accreditation.

Depending on the client group, a percentage of affordable dwelling will be required to comply both internally and externally with HfVN part 2: Housing with Integral Support.

5.3.5 Meeting the needs of Older People

Housing provision for older persons will be mainly directed at specific design solutions through mainstream affordable housing such as the provision of bungalows, flats with lifts and sheltered housing that can meet the needs of individuals outside of institutional care. Design aspects of proposals for this client group should deliver housing that incorporates flexible designs which enable adaptation for future needs and uses in terms of internal and external spaces. Incorporating features such as dementia friendly design and compliance with the requirements of HfVN applying to dwellings specifically for older and ambulant disabled people are also important.

Specific accommodation for the elderly will be expected to be provided in sustainable locations where there is reasonable access to facilities such as public transport, health care, shopping and other community facilities.

Use class 8 under planning legislation relates to nursing and care homes; and

Use class 9 relates to dwelling houses in general.

Use class 8 will not count towards affordable housing, however use class 9 will. This will include those hybrid proposals such as extra care housing schemes that accommodate individual dwellings that are self-contained (e.g. sheltered). Those instances that propose a mix of use class 8 and 9 the provisions for contributions of affordable housing will be applied on all use class 9 proposals.

5.3.6 External features

External design is also important with an expectation of a minimum area of usable garden space and areas for clothes drying wherever these are deliverable.

Incorporating features such as dementia friendly design and other features suitable for particular needs client groups.

Car parking provision for the affordable housing dwellings are usually required at 100% of the housing units.

5.3.7 Energy Efficiency

Scotland's Sustainable Housing Strategy sets out a vision for the new build market and developers to maximise the potential of innovative design and construction techniques to deliver more, greener, warmer, higher quality, affordable homes as part of sustainable neighbourhoods, creating export and other economic opportunities which will support low carbon economies and prevent fuel poverty.

It is therefore important that sustainable development is considered and integrated into plans and house types including the application of low carbon energy.

The Scottish Government supports Greener Standards in house building which also increases the energy efficiency of properties. Extra funding is available through the Government's Affordable Housing Supply Programme (AHSP) for homes meeting the 'silver' standard for emissions and energy use within section 7 of the 2011 building regulations in respect of energy for space heating.

5.3.8 Factoring

Developments often include design features which increase the management and maintenance costs of a development. Wherever possible affordable developments should not have a factoring charge and where they do this should be kept to a minimum e.g. it may be possible for the affordable housing provider to take on the maintenance of areas within the affordable housing location.

6 Affordable Housing Tenures

This Section of draft SPG sets out the range of tenures recognised by East Lothian Council as comprising ‘*affordable housing*’, in accordance with SPP and definitions set out in PAN2/2010.

6.1 Social Rent: Housing provided at an affordable rent and managed by a local authority, Registered Social Landlord or other not for profit social housing provider, regulated by the Scottish Housing Regulator. To qualify for Scottish Government subsidy, the design specifications require to meet ‘housing for varying needs’ criteria (see 5.3.5). Developments are not guaranteed to receive public subsidy, therefore early initial discussions with East Lothian Council’s Strategic Investment Team are critical to ensure inclusion within the SHIP.

6.2 Mid-Market / Intermediate Tenure Rent: Accommodation available at rents below market rent levels in a defined local area. Rents are typically lower than Local Housing Allowance levels. This tenure may be provided by a Registered Social Landlord, developer or alternative organisation agreed by East Lothian Council’s Strategic Investment Team. Rents and eligibility criteria will be set in agreement with East Lothian Council and the provider.

6.3 Subsidised Low Cost Home Ownership for Sale (shared equity): A publicly funded subsidised unit, sold at a level identified as being affordable within a local context. The householder pays for the majority share in the property with a Registered Social Landlord, local authority or Scottish Government holding the remaining share under a shared equity agreement. No rent or occupancy payment is taken and the householder owns the property outright. The householder may be required to buy out the equity balance at an agreed point in the future.

6.4 Low Cost Home Ownership (Shared Ownership): The householder purchases part of the dwelling and pays an occupancy payment to a Registered Social Landlord in respect of the amount outstanding. The householder has the ability to buy the dwelling in its entirety or increase the level of ownership of the dwelling in the future.

6.5 Unsubsidised Low Cost Home Ownership

6.5.1 (Discounted Sale Model): A standard dwelling sold by a developer in partnership with East Lothian Council, to an agreed identified client group, at a specified price below market value. The methodology for calculating the discounted sale assumes a multiplier of three times the median income level for each market area. The Tables set out at Appendix 1 of this document show income details for each housing market area⁶.

A Deed of Conditions is attached to the missives, in order to maintain the dwelling as an affordable unit to subsequent purchasers. The conditions are set out and agreed between East Lothian Council and the developer within a Section 75 agreement.

⁶ These figures will require to be reviewed annually

6.5.2 Unsubsidised Low Cost Home Ownership

(Golden Share): A model similar to Discounted Sale, with the exception of a difference in criteria in relation to pricing and eligibility. Typically the asking price is set at 80% of the market value in perpetuity, with the market value being set by an independent or District Valuer to the satisfaction of East Lothian Council. Eligible purchasers must be able to evidence a local connection and an ability to finance the purchase of the full market value of the property.

6.5.3 Unsubsidised Low Cost Home Ownership

(Unsubsidised Shared Equity): The householder purchases part of the dwelling, typically 60- 80% of the value, with the remainder of the stake held by the developer.

6.6 Self Build: Self-build refers to housing built by individuals or a group of individuals for their own use. This will involve developers selling serviced plots for self build to the intended owner occupier at a discounted price. East Lothian Council do not have any current guidance on self build, however The Scottish Government are currently working with relevant organisations to review best practice and current self-build procedures and guidance. The Council's Strategic Investment and Regeneration team will consider how to effectively support self-build with a new £4million self-build loan fund anticipated to become available during 2018 across Scotland.

Note – Not all of the above tenure options will deliver affordable housing in perpetuity. All tenure proposals must be agreed and supported by East Lothian Council's Strategic Investment Team

7 Partnership Working

Developers are expected to work in partnership with East Lothian Council and Registered Social Landlords, to ensure affordable housing needs are met i.e. tenure, house type and size. Collaborative working is also required in relation to masterplanning.

This Section of draft SPG sets out East Lothian Council's approach to partnership working, providing clarity on the roles and responsibilities of the various Council Teams, developers and Registered Social Landlords.

- **East Lothian Council's Strategic Investment & Regeneration Team**
 - Provide advice to developers on the preference for delivery i.e. onsite provision, offsite provision or a commuted sum
 - Provide information on the affordable housing requirement for individual areas
 - Agree the best locations and plot sizes for the affordable units
 - Provide a housing mix and house types based on need
 - Agree the affordable housing provider

- **East Lothian Council's Planning Team**
 - Attend pre-planning application meetings with key personnel invited
 - Consult with the Strategic Investment & Regeneration Team to seek comments on planning applications and ensure discussions between the Team and developer are reflected in applications
 - Ensure the Planning Officers report reflects the Strategic Investment & Regeneration Team's affordable housing requirements.
 - Ensure that the affordable component is secured through the s75 agreement

- **Planning Obligation Officer**
 - Monitor the progress of development and ensure the requirements of the s75 agreement are being met
 - Securing the Affordable Housing provision within the s75

- **East Lothian Council's Legal Team**
 - Securing the Affordable Housing provision within the s75
 - Securing Affordable Housing Agreements

- **Registered Social Landlords**
 - Seek support from the Council to deliver affordable housing
 - Agree housing mix and house types with the Strategic Investment & Regeneration Team
 - Ensure the Council is aware of phasing and timing for the purposes of the SHIP and Scottish Government's Affordable Housing Supply Programme.
 - Develop good working relations with developers to co-ordinate joint proposals

- **Developers**
 - Seek early discussions with East Lothian Council's Planning Department
 - Seek early discussions with the Strategic Investment & Regeneration Team to determine affordable housing requirements
 - Ensure that the requirements for affordable housing and any other Section 75 requirements are reflected within land negotiations
 - Develop good working relations with both the Council and Registered Social Landlords to co-ordinate proposals

8 Monitoring and Review

This draft SPG and associated mechanisms for delivery will be reviewed in accordance with the development planning cycle in relation to the HNDA, LDP and LHS and any other relevant information. It is anticipated that this SPG will be reviewed every two years.

Reviews will be more regular if a material change takes place i.e.

- changing legislation, policy or guidance
- housing need assessments reflect significant changes
- a material change in market conditions is evidenced which impacts upon commuted sum values

Monitoring of planning approvals and completions via the Housing Land Audit and SHIP will also inform Affordable Housing Policy review. The SHIP will be submitted to the Scottish Government every two years with the next submission due in November 2016.

The availability of Scottish Government subsidy will also change. This is confirmed annually at present, which creates difficulties in relation to agreeing tenure splits. It is anticipated that these annual programmes will change in coming years to reflect a three year programme.

Commuted sums and affordable sale prices will be reviewed every two years or earlier if there is a considered material change in market conditions. It is therefore anticipated that this guidance will also be reviewed every two years to reflect changing circumstances.

Appendix 1: Principles for Mid-Market Rent/Intermediate Tenure Rent

Properties to be made available as mid market or intermediate rent should be made available at a level below Local Housing Allowance rates.

Eligibility Criteria

In the allocation of mid market rent housing, priority will be given to applicants who fulfil the following criteria:

- Applicants should be in employment
- Meet income criteria – Applicants should normally have a regular net income within the following ranges set out in the table below.
- Have a local connection to East Lothian (although applicants with a local connection to specific sub area will be prioritised). A local connection consists of those applicants who currently live or work within the housing area or have immediate family in the area.
- The property must be appropriate for the household size.
- The property must be occupied as the households' sole and principle home.
- Applicants who don't have a regular income, but have access to other funds will be considered.
- Applicants will be required to provide satisfactory references and have a good credit record.

Local Housing Allowance	Bedroom Size	Income Range @ 80% LHA	Income Range @ 90% LHA
£504.00	1	£16,600 - £20,800	£18,700- £23,400
£630.00	2	£20,200 - £25,000	£22,600 - £28,400
£804.00	3	£25,000 - £33,000	£29,000 - £36,400

Priority Groups and Ranking

When allocating mid market rent properties, preference will be given to the following in order of:

- Those on Council or Housing Association housing list who have a local connection to the Housing Area. (Housing Area is defined as per East Lothian Council's lettings area).
- Those on Council or Housing Association housing list who have a local connection to East Lothian.
- Potential first-time buyers in employment but unable to secure a mortgage.
- Those currently living in unaffordable private rented housing or with relatives within the East Lothian area.
- Those who have been forced to sell their home due to a change in circumstances (e.g. reduced income) and who cannot obtain a mortgage nor afford private market rents.

Appendix 2: Income Details / Sale Prices

Income and sale price will be dependent on the circumstances and size of property being marketed. The applicant will need to demonstrate that they cannot buy a house suitable for their needs on the open market and the amount they can contribute is the maximum mortgage they can reasonably obtain plus their contribution towards the deposit.

Income Figures and Suggested Discounted Sale Price for a 2bedroom 3 person flat 65sqm							
Ward	Housing market area	Median household income	Average household income	Suggested single income	Average flat price	Mortgage multiplier x3	Discounted flat price 15% deposit
1	Musselburgh West	£32,124	£37,956	£28,361	£130,000	£85,085	£100,100
2	Musselburgh East and Carberry	£28,783	£34,399	£25,500	£125,000	£76,500	£90,000
3	Preston/Seton/Gosford	£32,296	£37,895	£29,920	£120,000	£89,760	£105,600
4	Fa'side	£32,009	£38,048	£30,600	£120,000	£92,800	£108,000
5	North Berwick Coastal	£42,092	£50,029	£39,746	£167,000	£119,238	£140,280
6	Haddington and Lammermuir	£36,182	£42,948	£31,166	£125,000	£93,500	£110,000
7	Dunbar and East Linton	£37,213	£44,066	£31,166	£125,000	£93,500	£110,000

Source: CACI data (2013) and DV calculation of commuted sum figure for each East Lothian ward area (August 2014)

Income Figures and Suggested Discounted Sale Price for a 2bedroom 4 person house 85sqm						
Ward	Housing market area	Median household income	Average household income	Average 2bed House Price	Mortgage multiplier x3	Discounted 2bed House price 15% deposit
1	Musselburgh West	£32,124	£37,956	£172,500	£113,868	£133,962
2	Musselburgh East and Carberry	£28,783	£34,399	£167,500	£103,197	£121,408
3	Preston/Seton/Gosford	£32,296	£37,895	£152,500	£113,685	£133,747
4	Fa'side	£32,009	£38,048	£150,000	£114,144	£134,287
5	North Berwick Coastal	£42,092	£50,029	£210,000	£150,087	£176,573
6	Haddington and Lammermuir	£36,182	£42,948	£172,500	£128,844	£151,581
7	Dunbar and East Linton	£37,213	£44,066	£167,500	£132,198	£155,527

Source: CACI data (2013) and DV calculation of commuted sum figure for each East Lothian ward area (August 2014)

Appendix 3: Criteria for Unsubsidised Low Cost Home Ownership (Discounted Sale Model)

First time buyers

- Gross annual household income should be up to the range of £ depending on area and house type. Savings will also be taken into account. Income to be verified by East Lothian Council.
- Purchasers must be able to secure a mortgage for their contribution
- Purchasers must be able to fund fees associated with the purchase of the property **or** (if there has been a significant change in household circumstances)

Second time buyers in need of larger property and unable to step up

- Circumstances and savings will also be taken into account. Income to be verified by East Lothian Council.

Circumstances:

- Overcrowded and evidence that the applicant is unable to step up
- Disabled person in unsuitable accommodation
- Marital break down

Appendix 4: Commuted sums (Valid until 31st March 2019)

Ward	HMA	commuted sum	
		house	flat
3	Preston/Seton/Gosford	£26,000.00	£7,400.00
5	North Berwick Coastal	£72,300.00	£45,400.00
1	Musselburgh West	£41,200.00	£15,400.00
2	Musselburgh East and Carberry	£37,000.00	£11,400.00
6	Haddington and Lammermuir	£41,200.00	£11,400.00
4	Fa'side	£25,500.00	£7,400.00
7	Dunbar and East Linton	£37,000.00	£11,400.00

Appendix 6: Consultation Questionnaire

This questionnaire is attached to help you respond to the East Lothian Council Draft Supplementary Planning Guidance on Affordable Housing, June 2018. It is also available online at <https://eastlothianconsultations.co.uk/> although you do not have to use this questionnaire to respond if you do not wish to do so.

Comments are invited **IN WRITING by 5pm on 17th August 2018.**

Q1. This draft SPG on Affordable Housing has been prepared to:

- Set out information and advice to individuals and organisations with an interest in affordable housing
- Provide clarity in relation to the affordable housing requirement and contributions to be sought
- Promote transparency and consistency with regard to the negotiation of developer contributions

Does draft SPG on Affordable Housing fulfil the above aims?

Yes /No / Unsure

Comments:

Q2. Does Section Two of draft SPG on Affordable Housing clearly set out the national and local strategic and policy context to the delivery of affordable housing?

Yes / No / Unsure

Comments:

Q3. Does Section Three of draft SPG on Affordable Housing clearly set out the identified need for affordable housing and corresponding key issues?

Yes / No / Unsure

Comments:

Q4. Does Section Four of draft SPG on Affordable Housing clearly set out East Lothian Council's approach to how the affordable housing requirement is expected to be delivered?

Yes / No / Unsure

Comments:

Q5. How do you feel about the commuted sum for each of the main areas being fixed for a two year period? Do you think each site should be valued on a site by site basis or are you happy that within the main areas, this sum is agreed for a period?

Yes / No / Unsure

Comments:

Q6. Does Section Five of draft SPG on Affordable Housing clearly set out the principles of the specification and design requirements?

Yes / No / Unsure

Comments:

Q7. Does Section Six of draft SPG on Affordable Housing clearly set out the affordable housing tenures recognised by East Lothian Council?

Yes / No / Unsure

Comments:

Q8. Should you wish to provide any additional or general comments on the Affordable Housing Quota and Tenure Mix SPG, please use the space below. You may also include any additional documents to support your response/s.

Additional or general comments

Versions of this publication can be supplied in Braille, large print, audiotape or in your own language. Please phone Customer Services if you require assistance on **01620 827199**
