

East Lothian Council
23 April 2024

Item 13: Progress of East Lothian Local Heating and Energy Efficiency Strategy (LHEES)
Amendment Submitted by Councillors Hampshire and Akhtar

The amendment replaces the text in the original motion from the section marked 'Motion' to the end:

Council agrees to:

Ask officers to carry out a full review of the Council's draft LHEES and bring forward a final strategy in compliance with Scottish Government guidance, noting that the strategy needs to provide the Council and our communities with a flexible approach going forward, and that, in the current financial climate, the Council is unable to take on any new financial commitments unless we have secured external grant funding that fully fund any projects we progress.
